Premier's Message

M ore than 2.4 million people hunt in Ontario each year, including some of the most passionate conservationists around. In fact, Ontario's hunters have been leaders in promoting responsible hunting.

Because of their outdoor experiences, responsible hunters have a deep respect for the natural world and a real appreciation for what it takes to keep it sustainable. They support the protection of wildlife habitat and the reintroduction of species. They understand the importance of conservation for future generations and they consider hunting to be part of our heritage.

Only through sound and sustainable practices will we leave our children the natural world we were lucky enough to inherit. This

principle is built into the proposed *Heritage Hunting and Fishing Act*, introduced by our government. If passed this legislation will recognize that lawful hunting and fishing are very much a part of Ontario's heritage as well as its economy.

Thank you for enjoying and protecting Ontario's wildlife and its habitat.

Mike Harris, MPP Ontario's Premier

Minister's Message

Tunting is an outdoor experience that is popular with hundreds of thousands of Ontario residents and visitors. It is a time-honoured tradition that is an important part of our rich heritage.

As Minister of Natural Resources, I am aware of the important contributions that Ontario's hunters make to wildlife management in the province. The money you spend on licences goes to the Fish and Wildlife Special Purpose Account where it is used for fish and wildlife management and conservation.

In recognition of the fact that hunting and fishing have been part of the fabric of life in Ontario for generations, our government has worked hard to increase hunting and angling opportunities through Ontario's Living Legacy and other initiatives.

For example, last fall we offered additional game seals for deer in certain Wildlife Management Units. By using these additional seals, hunters are enjoying more time afield while assisting Ministry of Natural Resources efforts to manage southern Ontario's expanding population of white-tailed deer.

Eighteen years after the first wild turkey was released in Ontario, the success of the reintroduction continues. The turkey population is strong and sustainable, and this spring several new Wildlife Management Units will have an open season. To make it more convenient to purchase your turkey licence once you have passed your course, a pilot project this spring will see turkey licences offered by selected hunting licence issuers. As well, turkey licences will be available through southern Ontario Ministry of Natural Resources offices and by telephone.

For several years, Ontario has been the North American leader in telephone application systems for big game draws and related services to hunters. Based on the success of last year's pilot of a telephone application system for the moose draw, the ministry is going to open it province-wide this spring. Hunters will be able to purchase a moose licence and apply to the draw (or take part in the antierless deer draw, controlled deer draw and find out draw results) by calling 1-800-288-1155. If you haven't yet used our convenient telephone services for hunters, I hope you will make 2002 the year you try them.

Your ongoing support for Ontario's wildlife management programs is a key factor in ensuring sustainable wildlife populations. It is only with your co-operation that we can conserve Ontario's wildlife for future generations.

John C. Snobelen Minister of Natural Resources

Message from the Chair of the Ontario Fish and Wildlife Advisory Board

The Ontario Fish and Wildlife
Advisory Board is a group of
individuals from across the province
who are making a difference for the
hunting community. Board members
are hunters, anglers, tourist outfitters,
trappers and commercial fishermen
people who truly care about the sustainable management of our natural
resources. I am proud to be the chairperson of an advisory body that
consists of such dedicated fish and
wildlife conservationists.

Over seventy per cent of the funding for fish and wildlife management comes from resource users through licensing, royalties, fines and other revenues collected under the Fish and Wildlife Conservation Act. These dollars go into a Special Purpose Account which is used only for fish and wildlife conservation and management. The Board was created in 1995 to provide advice to the Minister of Natural Resources on fish and wildlife matters. The Board monitors revenues and expenditures related to the Special Purpose Account, and has made many recommendations to improve wildlife management programs.

The Board has promoted excellence in customer service, with a special emphasis on hunting and angling clients. Moreover, we have provided valuable advice on licensing improvements, fee changes, and the introduction of new revenue sources to enhance fish and wildlife management. These recommendations have contributed to significant funding increases in the Special Purpose Account, enabling the Ontario Government to strengthen enforcement efforts, improve scientific understanding and provide more opportunities for the hunters of this province. The Board has also championed a number of specific hunting initiatives, including regulation reviews, enhanced hunting and wildlife-viewing opportunities, re-introduction programs for wild turkey and support for the restoration of elk populations.

Taking care of our fish and wildlife resources is a huge job. It can only be done successfully through teamwork, ongoing communication and information sharing among resource management professionals and all those who value the quality of life healthy resources make possible.

We are lucky to live in a province that offers some of the best hunting opportunities in the world. It is up to all of us to use our precious natural resources in a responsible manner so they can be enjoyed by future generations.

On behalf of the members of the Ontario Fish and Wildlife Advisory Board, I wish you all a great year and good hunting. We look forward to working with you.

Sandy Dickson

Chair of the Ontario Fish and Wildlife Advisory Board

andes Deikon

GOOD NEWS FOR HUNTING AND HUNTERS IN ONTARIO

The Hunting Heritage/Hunting Futures commissioned a public opinion survey in June of 2001. This survey was designed and conducted by Ipsos-Reid, a well respected polling company, to test the views of Ontarians on hunting and hunters. Here is a summary of key findings:

- 85% of Ontarians think that there are circumstances that make hunting acceptable;
- · 82% believe that hunting is part of Canada's heritage;
- 8% are against hunting under any condition;
- · 89% agree that hunting is acceptable if the meat is used for food;
- 57% are concerned about safety issues related to hunting;
- 69% concede they are not knowledgeable about hunting and 75% had little or no knowledge about existing regulations governing hunting in Ontario;
- 65% of Ontarians perceive hunters to be conservationists as well as consumers of wildlife; and,
- Nort-hunters get their information and develop opinions about hunting from personal experience and contact with hunters they know or hear about from friends and family. The media do not play a major role in educating the public about hunting.

How does this affect the future of hunting in Ontario? Here are the four main messages for every hunter to bear in mind:

- 1. Hunters should continually demonstrate that they make full use of hunted species for food and tolerate no waste.
- 2. Hunters should affirm that no species is threatened by legal hunting in Ontario.
- Hunters should continue to participate in wildlife management activities, including efforts to control wildlife populations.
- 4. Hunters can and must effect their own future role in Ontario's hunting heritage. Hunters are their own best and worst ambassadors and are in the best position to explain themselves to the non-hunting public.

For more information on Hunting Heritage/Hunting Futures, check our Web site at www.hhhf.org or contact us by mail at P.O. Box 5083, Huntsville, Ont., P1H 3K5.

PLEASE NOTE

Important New and Pending Regulation Changes

As the 2002/2003 hunting summary goes to press (March 2002) several regulation changes have been made or are possible for 2002/2003:

WATERFOWL

Migratory game bird seasons and bag limits are the responsibility of the Federal Government. In the past, as a service to hunters, we included the migratory game bird seasons in the Ontario Hunting Regulations Summary, However, the waterfowl seasons will not be finalized until June 2002. Seasons were not available at press time and therefore have not been included.

For further information contact: Canadian Wildlife Service, Environment Canada, 867 Lakeshore Road, Burlington, Ontario L7R 4A6 (905) 336-4464, or by Internet: http://www.cws-scf.ec.gc.ca/pub/summ/ont.pdf.

The migratory game bird hunting regulation summaries will be available at Canada Post Outlets by August 1.

DEER

Changes have been made to the boundaries of WMUs 82A, 83A, and 84. WMU 83A has been reduced in size and is now comprised of the geographic Townships of St. Edmunds, Lindsay, Eastnor and Albermarle, WMU 82A has been expanded to include the geographic Townships of Keppel and Sarawak and WMU 84 has been expanded to include the geographic Township of Amabel. The boundary between 82A and 84 south of Highway 21 is now the Grey Bruce County Line, not the previous boundary of Bruce Road 10. Changes are being considered for archery seasons in WMU 63B, 64A, 64B, 66A, 67 and 69B.

MOOSE

Proposed new archery seasons in WMUs 35, 36 and 37.

NORTHERN BOBWHITE

Changes are being considered for the northern bobwhite season in WMU 65.

WILD TURKEY

Open season changes are being considered for wild turkey in WMUs 64B, 69A and the United Counties of Prescott-Russell in WMU 65.

Regulation changes have been introduced that prohibit year-round wolf hunting and trapping in townships in and around Algonquin Provincial Park. See Furbearing Mammal Open Season Table on page 79 for the list of townships affected.

For details on the items listed above check with the local MNR office responsible for the wildlife management units involved. See page 86 for office locations and phone numbers.

How to use this Booklet

This booklet summarizes information dealing with licences and hunting laws. This summary is neither a legal document nor a complete collection of the current regulations. It is meant to be a convenient reference only. For complete details, see:

- a) the Fish and Wildlife Conservation Act, 1997, C.41 and the Regulations made under this Act:
- b) the Migratory Birds Convention Act Canada and the Migratory Birds Regulations; and,
- c) the Endangered Species Act, R.S.O. 1990, c. E.15 and the Regulations made under this Act.

Each wildlife species or group of species has a section in this summary. Each section deals with basic regulations on hunting the species including open season tables (showing when and where you can hunt that species). The maps that show Wildlife Management Unit (WMU) boundaries appear in the middle of this booklet.

See the Glossary on page 84 for an explanation of terms found throughout this summary.

You can obtain specific details of the Regulations (including more accurate descriptions of Wildlife Management Unit boundaries) from the appropriate offices of the Ontario Ministry of Natural Resources (MNR).

HUNTING includes lying in wait for, searching for, being on the trail of, pursuing, chasing or shooting at wildlife, whether or not the wildlife is killed, injured, captured or harassed. You need a hunting licence to do any of these things, except where the Fish and Wildlife Conservation Act states otherwise.

No person shall shine a light for the purpose of hunting wildlife during the period from half an hour after sunset to half an hour before sunrise. A person found shinning a light at night in a game inhabited area and in possession of a firearm may be charged.

NOTE: The holder of a licence to hunt raccoon at night may shine a light during this period for the purpose of hunting raccoon while accompanied by a dog licensed to hunt raccoon at night.

A PERSON SHALL NOT INTERFERE WITH SOME-ONE WHO IS LAWFULLY HUNTING, TRAPPING OR FISHING by tampering with equipment, placing themselves in a position for the purpose of interfering, or engaging in an activity to disturb wildlife or fish.

2002 Licence and Tag Information

(GST included in all fees)

(Tags and game seals are considered to be part of the licence.)

Ontario residents must have a hunting version Outdoors Card prior to purchasing a hunting licence or tag. See page 6.

These licence fees are in effect until December 31, 2002.

If you wish to hunt raccoon at night, you must carry your raccoon licence and your Outdoors Card that has a small game licence tag attached. You must also be accompanied by a dog licensed for raccoon hunting. You can only use a .22 calibre rim-fire rifle chambered to .22 short, .22 long or .22 long rifle for hunting raccoon at night.
c) Non-resident's small game licence
in the county of Lambton, the Municipality of Chatham/Kent or the county of Essex, except in the Township of Pelee.
d) Resident dog (raccoon) licence\$9.50
e) Non-resident's licence to hunt game birds on a game bird hunting preserve\$15.00
Non-residents who want to hunt game birds including wild turkey on a game bird hunting preserve only , must have this licence.
5. WILD TURKEY LICENCE TAG
AND GAME SEAL
Wild turkey licence\$21.00
If you are a resident, you must have a wild turkey licence along with your Outdoors Card with a small game licence tag attached. If you are a non-resident, you must have a wild turkey licence and a non-resident small game licence (see page 6 for requirements). 6. FALCONRY LICENCES a) General/Apprentice Falconry licence \$20.00 b) Commercial Falconry licence \$200.00

CAPTIVITY

Please contact your local MNR office for further information.

b) Resident's raccoon licence to hunt raccoon

at night\$16.00

MIGRATORY GAME BIRDS

(waterfowl, common snipe and woodcock)

To hunt migratory game birds, you must have a Federal Migratory Game Bird Hunting Permit and a Wildlife Habitat Conservation Stamp, as well as an Ontario licence to hunt small game. This includes hunting with falconry birds or non-indigenous falconry birds. You may buy a Migratory Game Bird Hunting Permit and Wildlife Habitat Conservation Stamp at any main post office.

NON-RESIDENT EXPORT PERMITS

(see also Export and Shipping under appropriate species)

NOTE: Permit is required for any part of the animal. including carcass hide or antlers

,,
Moose\$35.00
Deer
Bear

Licence Requirements

If you wish to hunt, you must have a licence valid for the species or group of species you are hunting, and you must carry the licence and any validation tags with you while hunting. You must show the licence to a Conservation Officer if asked to do so. Check the tables in this summary to see what, when and where you may hunt, (Animals listed in the tables may be hunted only during an open season.)

Residents and non-residents must be 16 years of age or older to be eligible for an Ontario licence to hunt. Residents may obtain a licence at 15 years of age, but they must first get consent in writing from both parents, one parent (if not living with both parents) or a legal guardian (also see Hunter Apprenticeship, on page 11).

Contact the Canadian Firearms Centre at 1-800-731-4000 (or http://www.cfc-ccaf.gc.ca/) for information about the requirements for firearms ownership, and firearms licensing.

immediately to the right of the card number. Hunting licence tags also expire on December 31, but the year of expiry may be different for your Outdoors Card and your licence tags, depending on how you purchase your licence(s). The expiry date for one-year licence tags is printed on the lower edge of the tag. Three-year small game hunting or fishing licences expire with the card. Your Outdoors Card, licence tag and any applicable paper licence must be current for you to have a particular hunting or fishing privilege.

Who needs a hunting version Ontario Outdoors Card?

To hunt in Ontario, an Ontario resident needs the hunting version Ontario Outdoors Card and all applicable licences.

The exception is the Ontario resident Hunter Apprentice hunting with a licensed Mentor. The Hunter Apprentice must carry an Ontario-issued Hunter Apprenticeship Safety Card. (The mentor must have an Ontario hunting version Outdoors Card and all applicable licences, see page 5.)

A resident of Ontario is defined as a person whose primary residence is in Ontario, and who has lived in Ontario for a period of at least six months during the previous 12 months prior to applying for a licence. Hunters who do not fit this definition must purchase a non-resident licence.

Ontario Residents

What is an Outdoors Card?

An Outdoors Card is a plastic, wallet-sized, identification card to which Ontario licence tag stickers are affixed. There are two versions of the card: the hunting version (which also allows for fishing privileges) and the fishing (only) version.

Hunting version Outdoors Cards are issued to Ontario residents only. The hunting version Outdoors Card or Temporary Hunting version Outdoors Card is the only card that provides an Ontario resident with hunting privileges. The hunting version Outdoors Card also provides fishing privileges, once a fishing licence tag is affixed. You must carry your hunting version Outdoors Card with you whenever you hunt or fish.

An Outdoors Card is valid for three calendar years, expiring on December 31 of the third year. The expiry date for your Outdoors Card is shown on the front of your card

Is an Outdoors Card a hunting licence?

No, an Outdoors Card is not a hunting licence. A complete and valid licence to hunt consists of an Outdoors Card plus the required hunting licence tags (affixed to the back of your Outdoors Card) plus any applicable paper hunting licences and game seals and/or validation tags.

One-year hunting licence tags are available from licence issuers located throughout Ontario. Call the MNR office that serves your area to find out the location of the issuer nearest you, and where you can purchase any required paper licences.

How do I get a hunting version Outdoors Card if I have never had one before?

A resident of Ontario who has never had a hunting version Outdoors Card may apply in one of two ways. The method you use to apply depends on how soon you want to go hunting or enter a wildlife validation tag draw.

Three types of hunting accreditation can be accepted when applying for a hunting version of the Outdoors Card. You must provide the original of one of the following:

- an Ontario Hunting Licence Examination Certificate/ Report issued to you after January 1, 1968; or,
- an Ontario resident's licence to hunt issued to you after January 1, 1968; or.
- an Ontario Hunting Licence Verification Certificate showing that you were issued a hunting licence as a resident or that you passed the Hunting Licence Examination.
- 1. If you do not intend to go hunting right away you can submit an Outdoors Card application with the original of your hunting accreditation, and payment, to the Outdoors Card Centre through the mail. You will receive the card, with any hunting or fishing licence tags you purchased affixed to the card, in approximately four to six weeks.

You can get an Outdoors Card application by calling 1-800-387-7011. The application form will be mailed to you.

2. If you want to hunt right away, or enter a wildlife draw, a Temporary Hunting Outdoors Card is only available from Ministry of Natural Resources offices. You must show the original of your hunting accreditation.

A Temporary Hunting Outdoors Card is valid for hunting during the open season as soon as the required hunting licence tags are affixed to the back, and any required paper licences, game seals and/or validation tags are obtained. The Temporary Hunting Outdoors Card is valid until the end of the calendar year. The fee for this Temporary Hunting Outdoors Card includes the cost of a three-year Outdoors Card. You will automatically be mailed the plastic three-year card at the end of the calendar year.

My Outdoors Card has expired. How do I renew it?

The date on which your hunting version Outdoors Card expires is shown on the front of your card (immediately to the right of your card number). To avoid any lapse in your privileges, it is recommended that you renew your card as soon as you receive your renewal package. This package is automatically mailed to you in the fall of the year in which your card expires.

You may renew your Outdoors Card in any of five ways. If you want to hunt right away or apply to a big game draw with a paper application and the draw deadline is imminent, you should renew by purchasing a Temporary Hunting Outdoors Card (see number five below). The five ways to renew are:

- by using the toll-free automated telephone system and your VISA, MasterCard or American Express credit card. Be sure to have your Outdoors Card number on hand when you call. Call 1-800-288-1155. Please allow two to three weeks for your card to reach you.
- 2. by connecting to the Internet at http://outdoorscard.mmr.stores.gov.on.ca and using your VISA or MasterCard credit card. You will need your Outdoors Card number and date of birth to complete this transaction. Please allow two to three weeks for your card to reach you.
- at more than 60 ServiceOntario Kiosk locations. ServiceOntario Kiosks accept VISA, MasterCard or American Express transactions as well as bank debit cards. You will need your Outdoors Card number when you renew. Please allow two to three weeks for your card to reach you.
- 4. by mail using the renewal package sent to you in the fall of the year in which your Outdoors Card expires. For the convenience of Outdoors Card holders, a renewal package is sent automatically so you may renew before your current card expires. Payment may be made by VISA, MasterCard, American Express, cheque or money order. Please allow four to six weeks after you submit your renewal for your card to reach you. If you have misplaced your package; call 1-800-387-7011 for a replacement.
- 5. by purchasing a Temporary Hunting Outdoors Card, in person, from a Ministry of Natural Resources office. The fee includes the cost of a three-year Outdoors Card. Hunters purchasing a Temporary Hunting Outdoors Card will be charged a \$10.00 administrative fee. You will automatically be mailed the plastic three-year Outdoors Card at the end of the calendar year.

COMMUNITY FISHERIES AND WILDLIFE INVOLVEMENT PROGRAM (CFWIP)

Under the MNR's Community Fisheries and Wildlife Involvement Program (CFWIP), Ontario anglers and hunters have participated in hundreds of fish and wildlife management projects. You can contribute to fish and wildlife conservation by getting involved. Encourage children to get involved in conservation activities; help develop a sense of stewardship in our young people.

Think of the future. Get involved with CFWIP.

For more information and project application materials, please contact an MNR office (see pages 86 and 87).

Some Outdoors Card and Hunting Licence Options for Residents of Ontario

A list of Ontario hunting licences is available on page 5. The one-year licence fees stated in this Summary are in effect until December 31, 2002. Three-year fees are subject to change after August 31, 2002. For the location of the licence issuer nearest you, contact the Ministry of Natural Resources. A list of Ministry of Natural Resources offices is provided on page 86.

Licence Type	Available From	Cost
Hunting/Fishing Outdoors Card plus three-year small game licence tag and three-year sport fishing licence tag.	Available by mail (new application or renewal), by telephone (renewal only) at 1-800-288-1155, over the Internet (renewal only) at http://outdoorscard.mnr.stores.gov.on.ca, or from a ServiceOntario Kiosk (renewal only).	\$120.00

Hunting/Fishing Outdoors Card only (no fishing or hunting licence tag), valid for three-years. Note: this Outdoors Card becomes a licence only when the appropriate licence tag is affixed. For some types of hunting, a paper licence, game seal and/or validation tag will also be required.	Available by mail (new application or renewal), by telephone (renewal only) at 1-800-288-1155, over the Internet (renewal only) at http://outdoorscard.mmr.stores.gov.on.ca, or from a 'ServiceOntario Kíosk (renewal only).	\$6.00
Ontario resident's moose licence tag, game seal and draw application. Expires December 31 in year of purchase.	Available by telephone (1-800-288-1155) for hunters who wish to apply for a moose validation tag on the the electronic licensing line (with a credit card). See page 27 for more information. Also available from numerous licence issuers throughout Ontario. For location of the issuer nearest you, contact the MNR office that serves y	
Ontario resident's deer licence tag, game seal and draw application. Expires December 31 in year of purchase.	Available by relephone (1-800-288-1155) for hunters who wish to apply for an antlerless deer validation tag on the electronic licensing line (with a credit card). See page 54 for more information. Also available from numerous licence issuers throughout Ontario. For location of the issuer nearest you, contact the MNR office that serves y	
Ontario farmer's deer licence tag, game seal and draw application. Expires December 31 in year of purchase.	Contact the MNR office that serves your area.	\$20.00
Ontario resident's black bear licence tag and game seal. Expires December 31 in year of purchase.	Available from numerous licence issuers throughout Ontario. For the location of the issuer nearest you, contact the MNR office that serves your area.	\$33.00
Ontario resident's one-year small game licence tag. Expires December 31 of the year for which it is valid.	Available from numerous licence issuers throughout Ontario. For the location of the issuer nearest you, contact the MNR office that serves your area.	\$17.00
Ontario resident's licence (paper licence) and game seal to hunt wild turkey. Expires December 31 in year of purchase. Not valid without a small game licence.	Available by telephone (1-800-288-1155) with a credit card. Also available from selected MNR offices and selected licence issuers in participating MNR districts. See page 19 for more information.	\$21.00 per licence, (max. two licences per hunter.)
Temporary Hunting/Fishing Outdoors Card.	Available at Ministry of Natural Resources offices.	\$6.00 plus \$10.00 administrative fee

I have a current Outdoors Card. but my licence tag has expired. How do I get a tag for this year?

Deer, moose, black bear and one-year small game hunting licence tags are available from licence issuers located throughout Ontario. Call the MNR office that serves your area to find out the location of the issuer nearest you, and where you can purchase any required paper licences.

How can I get more information on the Outdoors Card?

The staff at the Outdoors Card Centre would be pleased to provide any information you require and answer your questions.

You may reach the Outdoors Card Centre without charge from anywhere in Canada by telephoning:

1-800-387-7011

The hours of operation of the Outdoors Card Centre are Monday to Friday from 8:30 a.m. to 5:00 p.m. (EDT).

What should I do if my Outdoors Card is lost, stolen or destroyed?

If your Outdoors Card or any part of your licence is lost, stolen or destroyed, call the Outdoors Card Centre to arrange for a replacement. You will receive a replacement for the card and any three-year licence tags previously purchased. There may be a fee for replacement. To get an annual licence tag or paper licence replaced, you must complete an application form for a search for a fee of \$10.00 at an MNR office. If you lose a game seal, contact the local MNR office.

What else should I know about my Outdoors Card?

Here are other important things to keep in mind:

- you must notify the Ministry of Natural Resources of any address change within 10 days of the change. You can do this by calling the Outdoors Card Centre toll-free at 1-800-387-7011 or by using the Internet site at http://outdoorscard.mnr.stores.gov.on.ca. Failure to comply can result in a substantial fine under the Fish and Wildlife Conservation Act:
- you must carry your Outdoors Card, with all applicable licence tags attached, on your person whenever you are fishing or hunting. If a Conservation Officer asks to see your Outdoors Card, the law states you must show it;
- · your Outdoors Card is not transferable to another person - it provides privileges to you alone;
- it is an offence to provide false information on an Outdoors Card application, licence tag, game seal or validation tag or to accept a licence with no date or one dated before or after the date you applied for it; and,
- licences cannot be exchanged as part payment toward another type of licence.

Non-Residents of Ontario

I live outside Ontario. How do I get a non-resident licence to hunt in Ontario?

Non-residents of Ontario must present one of the following to obtain a non-resident licence to hunt in Ontario:

- an Ontario non-resident's hunting licence issued to you after January 1, 1968; or,
- · a hunting licence issued to you by a competent authority in any jurisdiction as a resident of that jurisdiction after January 1, 1968; or,
- an Ontario Hunting Licence Examination Certificate issued to you after January 1, 1968; or,
- an Ontario Hunting Licence Verification Certificate showing that you were issued an Ontario licence to hunt, or passed the Hunting Licence Examination; or,
- a certificate, issued to you after January 1, 1968, by a competent authority in any jurisdiction, giving you permission to purchase a resident's hunting licence in that jurisdiction.

NOTE: A non-resident who wishes to hunt in Ontario must be at least 16 years of age.

Some Hunting Licence **Options for Non-Residents**

The licence fees stated in this summary are in effect until December 31, 2002, A list of Ontario hunting licences is available on page 5.

Licence Type	Available From	Cost
Non-resident's small game licence	Available from numerous licence issuers throughout Ontario.	\$80.00
Non-resident's moose licence	Available from numerous licence issuers throughout Ontario. NOTE: see page 29 for information for non-residen wishing to hunt moose.	\$320.00 ts
Non-resident's deer licence (antlered deer only)	Available from numerous licence issuers throughout Ontario.	
Non-resident's black bear licence	Available from numerous licence issuers throughout Ontario.	\$160.00
Wild turkey licence	Available from selected MNR offices.	\$21.00 per licence (max. of two licences per hunter)

Where can I purchase a non-resident's hunting licence?

Non-resident hunters may purchase a hunting licence that is effective immediately, at many locations throughout the province. For the licence issuer nearest to your intended hunting location, call the MNR office serving that area. A list of MNR offices is provided on pages 86 and 87.

What should I know about bringing my hunting rifle or shotgun into Canada?

Effective January 1, 2001, federal firearms regulations require that hunters who bring rifles or shotguns into Canada declare their firearms at their point of entry. A fee is required to complete this procedure; this confirmed declaration is valid for up to 60 days. Firearms Declaration Forms are available from Customs offices. through the toll-free Canadian Firearms Centre information line at 1-800-731-4000, through the Canadian Firearms Centre Web site at www.cfc-ccaf.gc.ca, and often through hunting outfitters.

NOTE: Non-residents may face special requirements around the purchase of ammunition. Consult with your outfitter or call the Canadian Firearms Centre at 1-800-731-4000

Lost, Stolen or Destroyed Licences, Tags or Game Seals

If you lose your non-resident licence, you must complete an application for a search at an MNR office. The fee is \$10.00 for each lost licence. The search can only be done if the paper licence was purchased in the current year or the previous three years. You need to give the name and address of the licence issuer and the date of purchase (month and year). If possible, ask your licence issuer for the original licence number.

Licence Validity

The licence shows the period of time for which it is valid, commencing with the date and time of issuance. To be valid, the licences must be completed and signed. Licence validity or expiry dates do not indicate open season dates. For open seasons, see tables and maps in this summary.

All annual licences expire on December 31 in the year in which they were issued unless otherwise noted.

No small game hunting licence is valid from the 16th day of June to the 31st day of August for the area lying north and west of a line from Georgian Bay to the Ottawa River, formed by the southerly boundary of the District Municipality of Muskoka and the southerly and easterly boundaries of the Territorial District of Nipissing.

For more details on validity of licences, contact an MNR office.

Transfer of Licences

It is illegal to transfer, buy, sell or give a licence, tag, game seal or any component of a licence to another person. It is also illegal to use or possess a licence, tag, game seal or any component of a licence that was issued to someone else. Under certain circumstances, however, moose tags can be transferred (see group tag transfers, page 28). It is also an offence to do anything which would enable your game seal to be used by another

Licence Issuers

Licence issuers are located throughout Ontario, at convenient locations such as sporting goods stores, hardware stores and tourist camps.

The Nature Conservancy of Canada (NCC), established in 1962, is a non-profit, non-advocacy group that takes a quiet, businesslike approach to land conservation and the preservation of biological diversity. Its plan of action involves partnershipbuilding and entering into creative conservation solutions with any individual, corporation, community group, conservation organization or government body that shares its passion. As Canada's only national charity dedicated to preserving ecologically significant areas and places of special beauty and educational interest through outright purchase, donations and conservation easements, NCC is currently the largest private steward conserving ecologically sensitive lands in Canada, protecting over 1.67 million acres from coast to coast.

NCC uses sound conservation science in targeting lands for conservation and establishing priorities. We manage our lands and waters for their intrinsic natural values and for future generations, respecting and promoting nature's own processes of growth, succession and interaction, doing our work without undue interference. NCC recognizes the need to create avenues for humans to sustain themselves and live productively while conserving biological diversity. NCC's job does not end once a property is acquired. We ensure that the lands are well managed, that they continue to be conserved and their values protected after purchase.

As a partner of the Ontario Ministry of Natural Resources in the Eastern Habitat Joint Venture Program (see page 83), the Conservancy works with conservation-minded owners of priority wetlands to ensure the long-term conservation of those lands, through purchase, donation and conservation easement agreements. For more information on the Conservancy's Ontario programs, please call Linda Turner at 519-826-0068 ext. 230, or visit our Web site at www.natureconservancv.ca

Hunter Safety Education

Hunter Education Courses and Examinations

The Ontario Hunter Education Program has been in place for over 40 years and has graduated more than 1,000,000 new hunters since its inception. Hunter Education across North America has contributed to a steady decline in hunting-related incidents resulting in injury, making hunting today one of the safest outdoor recreational activities.

Ontario residents applying for their first Ontario licence to hunt and residents who cannot provide proof of having held a licence after January 1, 1968 must complete Ontario's Hunter Education Program and pass the Hunting Licence written and practical examinations.

New Ontario residents applying for an Ontario licence who can provide proof of resident hunting licence accreditation from any jurisdiction will receive one opportunity to pass the examinations without the requirement of taking the Hunter Education Program. Unsuccessful applicants will be required to complete the program before challenging the examinations again.

Ontario's Hunter Education Program is delivered by approximately 400 accredited instructors across the province. The 15-hour course (minimum) includes instruction on firearms and safe firearm handling, legal responsibilities. hunting ethics, wildlife identification and management, survival skills and first aid.

Students may alternatively take a "One-Stop" Ontario Hunter Education and Canadian Firearms Safety Course. Graduates of this program will meet provincial requirements to obtain a hunting licence and federal requirements regarding firearms ownership.

For a list of Hunter Education Instructors or Examiners in your area, please contact an MNR office, or the Ontario Federation of Anglers and Hunters at (705) 748-5785.

Hunter Apprenticeship Safety Program

The Hunter Apprenticeship Safety Program is designed to enhance the existing Hunter Education Program by allowing individuals the opportunity to safely develop their hunting skills while under the direct and immediate supervision of a qualified Mentor. Any person who is 12 years of age or older and who has successfully completed the Hunter Education Course and examinations is eligible to participate in the Hunter Apprenticeship Safety Program. The Hunter Apprenticeship Safety Program is mandatory for qualified participants under the age of 15 but is optional for new hunters who are 15 years of age or over.

Hunter safety is an integral component of this program and the following conditions apply to participants of the Hunter Apprenticeship Safety Program:

- Apprentice must be a resident of Ontario.
- 2. Written parental permission is required if the Apprentice is 12 to 15 years of age.
- 3. Apprentice must successfully complete the Ontario Hunter Education Program, including examinations.
- 4. Apprentice must carry a Hunter Apprenticeship Safety Card while hunting.
- 5. Apprentice, while hunting, must be under the direct and immediate supervision of a hunter (Mentor) who is 18 years of age or older and who holds a valid licence to hunt the species of game being hunted.
- 6. Apprentice must share a single firearm with the Mentor.
- If the species of game being hunted is wild turkey, the Apprentice must have successfully completed the Wild Turkey Education Program.
- If the species of game being hunted is a migratory game bird, the Apprentice must be the holder of a Migratory Game Bird Hunting Permit.
- Any game (except for migratory birds) taken by the Apprentice must be included in the bag limit of the Mentor.
- 10. Apprenticeship is valid for up to three years and is not renewable.
- 11. Mentor is responsible to ensure that the Apprentice complies with the regulations while hunting under the Mentor's supervision.

For additional information on the Hunter Apprenticeship Safety Program, contact an MNR office.

Hunter Orange

The objective of the hunter orange regulation is to maximize hunter safety without negatively impacting hunting success. Under this regulation, all licensed hunters, including archery hunters, hunting during the gun season for deer and moose are required to wear hunter orange. As well, all black bear hunters hunting during the black bear season are required to wear-hunter orange except when in a tree stand. Waterfowl hunters, wild turkey hunters and archery hunters in archery-only areas are exempt from the hunter orange requirement.

Hunter orange must cover a minimum of 400 square inches (2,580 square cm) above the waist and be visible from all sides. A hunting coat or vest generally meets this requirement. Hunter orange headcover is also required. Camouflage or open mesh hunter orange does not satisfy the requirements.

Hunter orange colour standards are generally consistent across North America. Retailers and manufacturers can provide information regarding clothing compliance with

General Regulations

Firearms

Firearms include air or pellet guns, bows and crossbows. You may use semi-automatic or self-loading firearms for hunting in Ontario, but not handguns or fully automatic firearms. Air and pellet pistols with a muzzle velocity less than 500 feet per second may be used for hunting in Ontario. For storage and transportation information, contact your local police department.

A firearm is considered to be loaded if it has a cartridge in the chamber or in a magazine that is attached to the firearm.

You must plug a semi-automatic or repeating shotgun so that it will not hold more than a total of three shells in the chamber and magazine combined. Under the Criminal Code of Canada you cannot possess any clip/magazine that holds more than five shots for a semi-automatic centre fire rifle unless that clip/magazine has been specifically exempted pursuant to the Firearms Regulations.

A muzzle-loader is a gun that is loaded through the muzzle. A percussion muzzle-loading gun is considered to be loaded if there is a charge of powder and a projectile in the barrel and a percussion cap on the nipple. A flintlock muzzle-loading gun is considered to be loaded if there is a charge of powder and a projectile in the barrel and the vent is unplugged.

A crossbow is considered to be loaded if the bow is cocked and there is a bolt in the crossbow. A bow other than a crossbow is considered to be loaded if the bow is strung and an arrow is nocked.

The draw length of a longbow is measured from the outer edge of the main riser (handle), following the line of an arrow to the anchor point.

The draw length of a crossbow is measured along the bolt ramp (where the bolt rests) from outer edge of the main limb, to the anchor point (release latch mechanism) at full draw.

The length of an arrow is measured from the base of the arrowhead to the bottom of the nock slot.

You must not discharge firearms from or across any right of way for public vehicular traffic or road in any part of Ontario designated in the Regulations or from or across the travelled portion in any other area. This does not apply to an unmaintained right of way unless the regulations provide otherwise. Generally, you are not allowed to have a loaded firearm between the fences, or if no fences, within eight metres from the edge of the travelled portion of a right of way for public vehicular traffic in parts of Ontario as listed in the Regulations. These regulations apply year round in most of Ontario south of the French-Mattawa river system (however, in some areas of southern Ontario, they only apply during the gun season for deer). Contact an MNR office for specific information.

On the Aulneau Peninsula (WMU 7A), from September 1 to December 15 and from April 15 to June 15, you must not use a shotgun loaded with ball or with shot larger than number 2 lead shot, steel shot that is not larger than triple BBB shot, bismuth shot that is not larger than double BB shot or a rifle of greater calibre or projectile power than a rifle

known as the .22 calibre rim-fire rifle. The calibre limitations do not apply to flintlock or percussion cap muzzle-loading rifles.

Check local sunrise-sunset times. You may only hunt from a half hour before sunrise to a half hour after sunset, except as otherwise provided. If you are in an area usually inhabited by wildlife, during the period from a half hour after sunset to a half hour before sunrise, you must unload and encase firearms (including air gun, pellet gun, bow or crossbow) in your possession. Firearms must be securely encased in a manner whereby they are not readily accessible.

Some townships/municipalities have by-laws restricting the discharge of firearms. Check with the local municipal office for details.

Remember: Hunting carelessly is an offence. Hunters who discharge firearms without due care and attention or consideration for persons and property, are liable to a fine of up to \$25,000 or imprisonment — or both. Depending on the circumstances, a person may also be subject to charges under the Criminal Code.

ANY hunting injury caused by the discharge of a firearm and which results in treatment by a physician MUST BE reported to a Conservation Officer.

Falconry

You must have a falconry licence to keep falconry birds in captivity. You also need a valid small game hunting licence to hunt with these birds. All birds must be banded, and you must maintain a logbook and submit an annual report on each bird. Falconry birds are: bald eagle, golden eagle, peregrine falcon, northern goshawk, gyrfalcon, northern harrier, broad-winged hawk, red-shouldered hawk, red-tailed hawk, sharp-shinned hawk, American kestrel, merlin, great horned owl, northern hawk owl, snowy owl and Cooper's hawk. No other specially protected birds (raptors) may be used to hunt.

You do not need a falconry licence to keep non-indigenous falconry birds. However, if you use them for hunting, you must have a valid small game hunting licence. All birds must also be banded, and you must keep a record of the origin of each bird and maintain a logbook. Non-indigenous falconry birds are: prairie falcon, saker falcon, lanner falcon, lagger falcon, Harris' hawk, ferruginous hawk, Swainson's hawk, Bonelli's eagle, European kestrel, European sparrow-hawk, tawny eagle and steppe eagle. No other non-indigenous raptors may be used to hunt.

Dogs

You must licence any dogs to be used to hunt deer, moose or bear. There is no limit on the number of dogs that may be licensed and used. Dogs may not run at-large in an area inhabited by deer, moose, elk or bear during the closed season.

You must have an authorization issued from the local MNR office to conduct dog training and field trials on game mammals and game birds during the closed season, or an appropriate hunting licence during the open season.

In order to hunt raccoon at night, you must be accompanied by a dog licensed for raccoon hunting and you must have a resident's tag to hunt raccoon at night.

For a dog coming into Canada from the United States, you must have a certificate, signed by a veterinarian licensed in Canada or in the United States, stating that the dog has been vaccinated against rabies during the preceding 36 months. The certificate must have a reasonably complete and legible description of the dog and the date of the vaccination. For more information, check with Canada Customs.

Dogs may be brought into Ontario without security if you list them as part of the Tourist Outfitter's and/or Sportsmen's equipment when completing the necessary customs forms.

Train and Trial Areas

Under the Fish and Wildlife Conservation Act, only persons who owned and operated train and trial areas on June 9, 1997 may be licensed. Operators of these areas must have applied for a licence by April 1, 1999. Licences granted to existing owners may not be transferred.

Licensed owners may be authorized to keep covote, red fox, varying hare and cottontail in captivity for this purpose, and are responsible for keeping these animals in a safe, sanitary and humane manner.

Chasing of coyote, red fox, varying hare and cottontail only is allowed.

No hunting or possession of firearms is allowed in a train and trial area.

Licensed owners must keep detailed records of usage of the areas. For more information about these areas, contact an MNR office.

Snares

Snares cannot be used, except by licensed hunters for taking varying hares north of the French and Mattawa rivers with a snare constructed of copper or brass wire between 22 and 24 gauge. The opening of the snare wire loop must be 10 cm (4 in.) or less in diameter.

Poison and Adhesives

Poison and adhesives cannot be used for taking wildlife.

Use of Vehicles or Boats

Aircraft, snowmobiles, vehicles or boats may not be used for chasing, pursuing, worrying, molesting, killing, injuring or destroying any wildlife.

It is illegal to have a loaded firearm in or on, or discharge a firearm from, an aircraft, vehicle (including snowmobile and all terrain vehicle) or motor boat or anything towed by the boat. An exception to this rule is that a person may obtain an authorization through the local MNR office if the person's mobility is impaired and the person meets one of the following criteria:

- 1. A paraplegic or hemiplegic.
- 2. A single (above the knee) lower limb amputation or a double (below the waist) amoutation.
- 3. Suffers severe disability, and cannot hunt without the use of a wheelchair or similar means of locomotion. In this case, must provide a medical certificate stating disability.

A loaded firearm may be carried in, and discharged from a canoe that is being paddled, with no motor attached. You may not hunt moose, deer or black bear while they are swimming.

NOTE: Restrictions on the use of motor boats. Under the Fish and Wildlife Conservation Act a motor boat means a boat with a motor that is attached to the boat. There is an exception to this rule if you are hunting waterfowl in accordance with the Migratory Birds Convention Act.

Under the Migratory Birds Convention Act a person may hunt migratory game birds from a powerboat if the motor is not in operation and the forward motion has ceased. A powerboat may be used for the purpose of retrieving migratory game birds.

Trespassing

A hunting licence does not give hunters the right to enter private property.

ALWAYS ask for permission and obey signs. Red circles of at least 10 cm (4 in.) in diameter mean no entry is permitted. Yellow circles of at least 10 cm (4 in.) in diameter mean that no entry is permitted except for activities which may be allowed. If it is not evident what activities are allowed, ask for permission from the landowner. Not all land is signed. Unsigned lands may be private land as well. It is your responsibility to find out who owns the land you wish to hunt on and obtain permission. If unsure, stay out, Positive landowner/hunter relationships are important to the future of hunting in Ontario.

Be sure you are familiar with the Occupiers' Liability Act R.S.O. 1990, c. O.2 and the Trespass to Property Act, R.S.O. 1990, c. T.21 before entering private land. You may obtain these two Acts from Publications Ontario.

You will also be violating the Fish and Wildlife Conservation Act if the landowner asks you to leave and you do not do so immediately, or if you do not obey signs prohibiting hunting and fishing.

WILDLIFE ENFORCEMENT A DECOYS

Ontario Conservation Officers use simulated wildlife to detect unlawful harvest and violations of public safety under the Fish and Wildlife Conservation Act.

If you are hunting in a party of more than 12 you may not hunt upon any enclosed or unenclosed lands in any county or regional municipality without permission of the landowner.

Before hunting on Indian Reserves, ask the permission of the Band Council.

If you wish to hunt deer on Barrie Island, Cockburn Island or Manitoulin Island, you must have with you a valid deer licence and the written consent of the landowner on the form provided by MNR. If you wish to hunt moose in WMU 65, you must have a moose licence, the appropriate validation tag and written consent of the landowner on the form provided by MNR.

Crown Lands

In Ontario, travel for recreational purposes on Crown lands and waters is generally free and unrestricted. Generally, camping is allowed free on Crown lands up to 21 days per year except where posted. However, some Crown lands may have restricted-travel zones for forest fire prevention. officially closed forest-access roads or specific areas posted with signs to prohibit all or certain kinds of uses or travel. Contact an MNR office for further information.

Non-residents, except those using a camping unit rented from a person who carries on a business (commercial outfitter), require a permit to camp on Crown land north of the French and Mattawa rivers. Camping unit is defined as equipment used for the purpose of outdoor accommodation and includes a tent, trailer, tenttrailer, recreational vehicle, camper-back and any watercraft equipped for overnight accommodation. Contact an MNR office or licence issuer for permits.

Some Crown lands may be posted against hunting and possession of firearms to protect forest workers or other resource users. Contact the local MNR office for the area in which you wish to hunt for details on safety-related hunting area closures.

New 2002 Non-Resident of Canada Crown Land Camping Restrictions - WMUs 6, 7B, 9A, 9B.

Effective 2002 for non-residents of Canada, Crown land camping is prohibited within 1 km of the following road systems in Kenora and Fort Frances Districts between October 1 - November 15.

- Hwy 71 and roads branching off of Hwy 71 from Strachan Road to the junction of Hwy 17;
- Hwv 596, Caribou Falls Road and Sand Lake Road and all roads branching off of these roads to the junction of the English River Road;
- · Rush Bay Road and branch roads;
- Shoal Lake Road and branch roads; and
- · Gundy Lake Road and branch roads.

For more information contact Kenora District at 807-468-2501 and Fort Frances District at 807-274-5337.

Game Preserves

Except where stated in the Regulations, you may not hunt or trap, or use or possess firearms in Crown Game Preserves. You may possess firearms if you live on private land within a Crown Game Preserve, but you may not hunt or trap. There are Crown Game Preserves other than those shown on the maps. Contact an MNR office for more details.

Provincial Parks

You may not hunt (or take) any mammals, birds, amphibians or reptiles, in provincial parks, or have a firearm with you, unless otherwise provided in the Regulations. Check with your local MNR office or the Regulations for more details and for special permit requirements for hunting in Clyde, Bruton and Eyre townships (WMU 54). See page 21 for listing of eligible parks.

Wildlife Management Areas -Wildlife Extension Landowner Agreement Area / Provincial Wildlife Area (see table below)

There are 34 Provincial Wildlife and Wildlife Extension Landowner Agreement Areas in Ontario which provide hunting. Some areas have daily or seasonal licence fees, while others may be used free of charge. Some areas are only open on certain days of the week and for special hours and designated species. Detailed information on each area can be obtained from MNR offices. See pages 44, 46 and 48 for listings.

Hunting on Sunday

You may not carry or discharge a firearm, except bows or crossbows, on Sunday for the purpose of hunting in:

- a) any county except the County of Renfrew (except the Township of Raglan), the United Counties of Prescott-Russell, and the Township of Haldimand in the County of Northumberland:
- b) any regional municipality lying south of the French and Mattawa rivers:
- c) the City of Toronto; or,
- d) the territorial districts of Muskoka, and Parry Sound and that part of the Territorial District of Nipissing comprising the geographic townships of Boulter and Chisholm and the parts of the geographic townships of Ballantyne, Butt, Finlayson, McCraney and Paxton lying west of the western boundary of Algonquin Provincial Park.

The above does not apply to hunting on a licensed game bird hunting preserve.

Guides

You may not act as a guide for moose and deer hunting in the Territorial District of Rainy River unless you have a valid guide's licence. A non-resident of Canada cannot be a guide and cannot obtain this licence.

Non-residents must be accompanied by one licensed guide for each two hunters when hunting deer or moose in the Territorial District of Rainy River.

Conservation Officers

Conservation Officers have powers of inspection, arrest, search and seizure under the various statutes they enforce, including the Fish and Wildlife Conservation Act, the Migratory Birds Convention Act and the Fisheries Act. When carrying out his or her duties, or investigating an offence under these statutes or the corresponding regulations, a Conservation Officer may do the following:

- stop and/or inspect a vehicle, boat, aircraft, firearms, ammunition, game or fish;
- ask questions relevant to the inspection;
- inspect buildings or other places;
- search with a warrant;
- search without a warrant in circumstances requiring immediate action:
- seize items related to the offence; and,
- arrest anyone the Conservation Officer believes has committed, is committing, or is about to commit an offence under these Acts.

Conservation Officers operate random "Game Check Stations" throughout the year. At these stations, Conservation Officers collect information on game taken by hunters and make sure the regulations are being followed in order to better manage our wildlife resources.

Fish and Wildlife **Conservation Act**

The Fish and Wildlife Conservation Act is the main provincial law regulating hunting and trapping. The Fish and Wildlife Conservation Act is enforced by Conservation Officers and Deputy Conservation Officers.

The penalties for offences under the Fish and Wildlife Conservation Act can include:

General offences. \$25,000.

1 year imprisonment, or both.

Commercialization

related offences. \$100,000, 2 years imprisonment,

or both.

Specially Protected Wildlife

In Ontario, it is illegal to kill specially protected wildlife (see Glossary, page 85, for a list of these species) except in protection of property.

The ministry is interested in receiving information about any illegal acts involving specially protected wildlife. Please contact the local MNR office.

Endangered Species

The Endangered Species Act protects 29 species of animals and plants and their habitats. These are: small white lady's-slipper orchid, small whorled pogonia, large whorled pogonia, cucumber tree, prickly pear cactus, heart-leaved plantain, slender bush clover, horsetail spike-rush and fewflowered club-rush (also known as shy bulrush), frosted elfin, Karner blue butterfly, Lake Erie water snake, blue racer, timber rattlesnake, white pelican, bald eagle, golden eagle, peregrine falcon, piping plover, Eskimo curlew, Kirtland's warbler, eastern cougar, loggerhead shrike, Blanchard's cricket frog, Henslow's sparrow, wood poppy, hoary mountain mint, king rail and prothonotary warbler.

Anyone who interferes with, injures or kills an endangered species or destroys the habitat of an endangered species is liable to a fine of up to \$50,000 or two years imprisonment-or both. Contact an MNR office for more information about endangered species.

Protection of Property

Generally, you may on your own land, capture, kill or harass wildlife to stop that wildlife from damaging your property. This does not apply to moose, caribou, elk, endangered species or the trapping of black bear. White-tailed deer may be killed or harassed with an authorization from the ministry. You may also use an agent if the agent is authorized by the ministry or belongs to a class of agents prescribed by the Regulations. There are exceptions to this. Contact an MNR office for further information. Black bears killed in protection of property must be immediately reported to an MNR office. A person may not use a body gripping trap or be in possession of a body gripping trap unless he or she is lawfully entitled to use the trap.

Elk and Caribou

There is no open season for elk or caribou in Ontario.

Game Wildlife and Parts

You may not let the flesh of any harvested game wildlife which is suitable for food be destroyed, spoiled or abandoned. This includes black bear.

It is illegal to buy, sell or barter any game wildlife or specially protected wildlife or their parts, except under the authority of a licence and as permitted by the regulations. Contact an MNR office for more information.

In addition, you may purchase only the meat of furbearing mammals from a person licensed to take that furbearer for your own use or that of your immediate family. A person selling a carcass of a furbearing mammal for consumption must advise the buyer in writing that the meat has not been inspected under the Meat Inspection Act.

A person without a licence may buy or sell a single hide of black bear, with head and claws attached, and a single hide of a deer and moose, without the head attached, and a single set of cast antlers of caribou, elk, deer and moose if they are lawfully acquired.

A person who wishes to buy more than a single hide or single set of cast antlers must have a dealer's licence. Please contact an MNR office

The above regulations now apply not only to meat and parts of Ontario wildlife, but also to meat and parts imported into Ontario from outside the province.

BLACK BEAR GALLS - You cannot possess a black bear gallbladder that has been removed from a black bear.

Possession of Accidentally Killed Animals

If you wish to keep animals including certain birds (other than migratory birds) killed by natural or other accidental causes including road kills, a Certificate of Reporting Game must be obtained. In the case of black bear, moose, deer, elk and caribou, you must report the acquisition to an MNR office immediately. For specially protected raptors and furbearing mammals, you must make the report within two working days from when you acquired it. You need a Licence to Possess a Pelt for furbearing mammals. In addition, anyone who acquires a specially protected raptor must take the carcass to an MNR office for registration within five working days of the acquisition. For migratory birds, contact the Canadian Wildlife Service, Burlington at (905) 336-4464.

A person who kills a specially protected raptor or a furbearing mammal in protection of property, and is planning to keep the carcass, must report the acquisition. A person

who kills a black bear in protection of his/her property must report it to the MNR district/area office whether or not the carcass is kept.

Export and Shipping

You must have an Ontario export permit to export moose, deer and bear or any part thereof from Ontario (see pages 22, 50 and 73 for more information).

An Ontario export permit for non-residents is \$35.00. For residents of Ontario, export permits are issued at no charge.

Residents and non-residents may export from Ontario game wildlife legally killed under the appropriate licence, if they produce a valid hunting licence for those species.

A resident may temporarily transport moose, deer or bear out of Ontario without an export permit if the resident is on the way to a location in Ontario, and does not leave any of the wildlife outside Ontario.

You must have an Ontario export permit to export any furbearing mammal, or its pelt from Ontario (see page 79 for more information).

The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) is an international agreement which regulates trade in a number of species of animals and plants, their parts and derivatives, and any articles made from them. You need a CITES permit to export wolf, black bear or several other species from Canada.

The CITES permit requirement is waived for U.S. or Canadian residents in some instances (see page 73). In some instances both a CITES permit and a provincial export permit are required.

CITES permits are currently available free of charge from most MNR offices.

A person shall not possess wildlife that was killed, captured, taken, possessed, transported, bought, sold or removed from another jurisdiction contrary to the laws of that jurisdiction.

A person shall not sell wildlife from another jurisdiction if the sale is not permitted in the jurisdiction that it was originally exported from.

Wildlife in Captivity

The Fish and Wildlife Conservation Act requires you to have a licence in order to keep game and specially protected wildlife in captivity. Some propagated game birds may be sold under a licence. No licence is required to purchase these game birds. Contact an MNR office for more information.

Wild Turkey Seasons and Other Regulations

Licence Fee (GST is included)

Wild Turkey Licence and Game Seal. \$21.00 per licence (maximum of two licences per hunter)

If you are a resident, you must have a wild turkey licence along with your Outdoors Card with a small game licence tag attached. If you are a non-resident, you must have a wild turkey licence and a non-resident's small game licence (see page 6 for requirements).

WILD TURKEY* 2002

WMU(s)	Open Season	Bag Limit	Hours
59, 60A, 61, 63, 64A, 65 (except for the United Counties of Prescott- Russell), 66A, 67, 68, 69B, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83A, 84, 85, 87, 88, 89, 90, 91, 92, 93A	residents and non-residents Apr. 25 to May 31	bearded wild turkey per licence per day licences per hunter maximum	1/2 hour before sunrise to 12:00 p.m. (noon)

^{*} Wild Turkey Open Season in 2003: April 25 to May 31.

Open season changes are being considered for wild turkey in WMUs 64B, 69A, and the United Counties of Prescott-Russell in WMU 65.

The Status of the Wild Turkey

Wild turkeys are native to Ontario. They were extirpated in the early 1900s through a combination of a decline in the amount of their forest habitat and unregulated hunting. In 1984, the Ministry of Natural Resources (MNR) and the Ontario Federation of Anglers and Hunters (O.F.A.H.) teamed up to begin the process of reintroducing this magnificent bird to southern Ontario forests. The population is now at more than 35,000 wild turkeys, spread primarily through southern Ontario. As new flocks become established, turkey hunting opportunities are expanding to new areas.

Wild Turkey Licences

If you have never hunted wild turkeys in Ontario before, you must take a seminar and pass a test in order to get a wild turkey licence.

The Wild Turkey Hunter Education Seminar Program sponsored by the O.F.A.H. teaches safety, ethics and successful turkey hunting techniques. Participants must attend a seminar and pass a written, multiple-choice test to receive a certificate which allows them to purchase an Ontario wild turkey licence.

The schedule of wild turkey seminar locations and dates is available each January from the O.F.A.H. at (705) 748-6324, or the O.F.A.H Web site at www.ofah.org or from local MNR offices in areas with a wild turkey hunt.

Ontario residents wishing to hunt wild turkeys must have:

- a valid hunting version Outdoors Card:
- a small game licence tag (the sticker that goes on the back of the Outdoors Card); and,
- a wild turkey licence (a paper licence that must be carried when hunting) and game seal.

Wild turkey licences are available provincewide through the Ministry of Natural Resources' Electronic Licensing Line, an automated telephone system (see page 12). In addition, some MNR offices in southern Ontario offer counter sales of wild turkey licences. This spring, selected licence issuers will also sell wild turkey licences as a pilot project. MNR offices involved in the pilot include: Kemptville, Minden, Guelph, Niagara, Pembroke, Kingston, Peterborough, Bancroft, Midhurst, Aylmer, Aurora and Clinton.

Ontario residents wishing to purchase a wild turkey licence from a licence issuer participating in the pilot project must show the following at the time of purchase:

 their Outdoors Card bearing a thermal printed gold "T" insignia;

OR

 their valid hunting version Outdoors Card plus their Wild Turkey Hunter Education certificate;

• their valid hunting version Outdoors Card plus a previous Ontario wild turkey licence bearing the hunter's name and Outdoors Card number.

Non-residents wishing to purchase a wild turkey licence from an MNR office or licence issuer must show their Wild Turkey Education certificate.

The Electronic Licensing Line allows Ontario resident hunters to purchase a wild turkey hunting licence using a toll-free telephone line, 24 hours a day, seven days a week from March 1 to April 30. To use this system, a hunter who has received a certificate at a wild turkey seminar needs:

- a valid hunting version Outdoors Card number;
- a valid VISA, MasterCard or American Express card;
- · a Touch-Tone telephone.

The hunter will be instructed to enter the required information using the telephone's keypad. Please note: This system does not accept spoken answers; only responses provided using the keypad can be processed.

To purchase a licence using the Electronic Licensing Line, call 1-800-288-1155 between March 1 and April 30, 2002. Hunters wishing to purchase two wild turkey licences by telephone must place two calls. Your wild turkey licence(s) and game seal(s) will be mailed the next business day. Please allow time for your licence(s) and game seal(s) to reach you.

Wild Turkey Hunting Regulations

The following is an overview of wild turkey hunting regulations. For complete information, or if you have additional questions, please contact an MNR office that serves the area in which you would like to hunt. A list of MNR offices can be found on page 86.

The wild turkey hunting season is open from April 25 to May 31, 2002, in selected Wildlife Management Units in southern Ontario. The harvest limit is two bearded wild turkeys per hunter per season. A licence is required for each of the two birds. You may buy both licences in advance, but the two birds may not be taken on the same day. You are permitted to call wild turkeys for another hunter after filling your own licence(s), but you must not be in possession of a firearm when doing so.

Wild turkeys may be hunted using shotguns (including muzzle-loading shotguns) and archery equipment. Shotguns must be no larger than 10 gauge, and not smaller than 20 gauge, loaded with shot sizes 4, 5 or 6.

When archery hunting, bows must meet the following specifications.

Crosshows:

- draw length must be at least 300 mm (11.8 in.);
- draw weight must be at least 45 kg (99.2 lb.);
- bolt head must be at least 22 mm (0.9 in.) at the widest
- there must be at least two cutting edges of straight, sharp, unserrated, barbless steel.

Longbows:

- draw weight must be at least 18 kg (39.7 lb.) at draw length of 700 mm (27.6 in.) or less;
- arrow length must be at least 600 mm (23.6 in.);
- arrow head must be at least 22 mm (0.9 in.) at the widest point; and,
- there must be at least two cutting edges of straight, sharp, unserrated, barbless steel.

For information on measuring draw length and arrow length, refer to page 13 under "Firearms".

You may not use live decoys or electronic calls while wild turkey hunting in Ontario. You may not hunt wild turkeys with the use of bait.

Sealing and Transporting

The holder of a licence who has killed a wild turkey shall:

- a) immediately after the kill and at the site of the kill attach the seal provided with the licence or licence tag to the wild turkey in the manner indicated on the seal;
- b) keep the seal attached to the wild turkey until it is prepared for consumption; and,
- c) take the intact carcass of the bird (with or without guts) to a designated check station between 8:00 a.m. and 2:00 p.m. on the day of the kill.

It is mandatory for hunters to take their wild turkey to an MNR check station on the day of the kill. For a list of check stations please contact the MNR office in the area you plan to hunt, or log on to www.mnr.gov.on.ca and click on Fish and Wildlife.

Non-resident Opportunities

Ontario's wild turkey season is also open to non-residents who:

- · are accredited hunters:
- have taken the Ontario Wild Turkey Hunter Education Seminar and passed the written test; and,
- have purchased a non-resident's small game licence and a wild turkey licence.

GAME CHECK STATIONS

Throughout the hunting season, Conservation Officers will be operating "Game Check Stations" under the authority of the Fish and Wildlife Conservation Act. These inspections are carried out to ensure compliance with the Fish and Wildlife Conservation Act and regulations. These check stations also assist us in protecting and managing our wildlife resource by providing the ministry with information about wildlife harvested by hunters.

Wild Turkey Seminars

Wild turkey hunting is unlike any other type of traditional hunting in Ontario. Hunters who have taken up the challenge agree that the pursuit of wild turkey is one of the most thrilling forms of hunting.

The Ontario Federation of Anglers and Hunters delivers the Wild Turkey

Hunter Education Program in partnership with the Ontario Ministry of Natural Resources. Anyone wishing to hunt wild turkeys in Ontario for the first time must take this one-day course before they can obtain a licence.

Seminars taught by experienced wild turkey hunting enthusiasts are offered in both the spring and fall across southern Ontario

Even for those people who do not hunt, the affordably priced Wild Turkey Seminar is a worth while investment. The program covers the natural history of the wild turkey, equipment, calling. hunting safety and ethics, hunting regulations, and hunting techniques. Emphasis on conservation and wild turkey restoration are also part of this comprehensive program.

For a complete list of Wild Turkey Hunter Education Seminars, or to register, call the O.F.A.H. at 705-748-6324 or visit the O.F.A.H Web site at www.ofah.org.

Hunting in Ontario Provincial Parks

Permitted by regulations made under the Fish and Wildlife Conservation Act. Hunters are advised to check with the Parks Office for further details.

SPECIES - Moose, Grouse, Varving Hare

- Lake Superior (portion)

SPECIES - Game Birds or Game Mammals (excluding Wolf)

- Algonquin (Clyde & Bruton Twps.)

Moose Seasons and Other Regulations

Licence Fees (GST is included in all fees)

1.	Resident's licence tag to hunt moose\$40.00)
2.	Non-resident's licence to hunt moose\$320.00)
3.	Dog licence)

Non-resident's Export Permit Fee (also see Export and Shipping)...\$35.00 This permit is required for any part of the moose, including carcass, hide or antlers.

Resident's Export Permit Fee issued at no charge.

DRAW RESULTS LINE: 1-800-288-1155 (available after August 1). Call toll-free to determine your success in the draw for moose adult validation tags.

Firearms

Big game, including moose, may only be hunted with a firearm (this includes bows).

A rim-fire rifle, a shotgun smaller than 20 gauge when loaded with shot or any shotgun loaded with shot smaller than SG or No. 1 buck cannot be used for hunting moose.

When archery hunting, bows must meet the following specifications.

Crossbows:

- draw length must be at least 300 mm (11.8 in.);
- draw weight must be at least 54 kg (119 lbs.);
- bolt head must be at least 22 mm (0.9 in.) at the widest point; and.
- there must be at least two cutting edges of straight, sharp, unserrated, barbless steel.

Longbows:

- draw weight must be at least 22 kg (48.5 lbs) at draw length of 700 mm (27.6 in.) or less;
- arrow length must be at least 600 mm (23.6 in.);
- arrow head must be at least 22 mm (0.9 in.) at the widest point; and,
- there must be at least two cutting edges of straight, sharp, unserrated, barbless steel.

For information on measuring draw length and arrow length, refer to page 13 under "Firearms".

NOTE: You may not hunt moose while they are swimming.

Export and Shipping

Residents and non-residents must have an Ontario export permit to export moose or any part of a moose from Ontario. You may obtain an export permit from most MNR offices in the area where the animal has been taken as well as from specific outside issuers (contact the local MNR

office for details). You should obtain the export permit before reaching a border point to avoid any inconvenience.

A resident may temporarily transport a moose out of Ontario without an export permit if the resident is on the way to a location in Ontario and does not leave any part of the moose outside Ontario.

A non-resident must pay \$35.00 for an export permit. Export permits have sub-permits attached to them for exporting a part or parts of the animal for which an export permit has been issued. You may use up to three sub-permits for this purpose. Receptacles containing game wildlife or specially protected wildlife that are being shipped or transported to points inside or outside Ontario must have the names and addresses of the sender and receiver, and a list of the contents written on the outside.

Guides

Non-residents must be accompanied by one licensed guide for each two hunters when hunting moose in the Territorial District of Rainy River, Wildlife Management Units (WMUs) in the Territorial District of Rainy River include: 9B, 10, 11A and parts of 7B and 12B.

Information for Ontario **Residents Wishing to Hunt Moose**

Who can hunt moose in Ontario?

A resident of Ontario who has a valid hunting version Outdoors Card and a current moose hunting licence tag (sticker that goes on the back of the Outdoors Card), may hunt calf moose in any WMU that has an open season. The exception to this is WMU 65 which has a hunt with controlled hunter numbers (see pages 29 and 33 for more information on the controlled hunt in WMU 65 or call the Kemptville District Office at 613-258-8204).

To receive a validation tag to hunt for an adult moose, the resident hunter must purchase a moose licence and apply to the moose validation tag draw for either a bull tag or a cow tag. Adult tags are issued through a computerized lottery. The validation tag authorizes the holder to hunt only the sex of adult moose described on the tag in the WMU specified.

Residents of Ontario who are going to be a guest of a qualified tourist outfitter at the time of the hunt may be able to get an adult moose validation tag through the outfitter. The tag is valid only if you are a registered guest and actually accommodated at the tourist establishment. This may be on a Crown land site if authorized for occupancy by the ministry, or at a camp operated by the outfitter.

How do you define a calf, a cow and a bull moose?

A calf is a moose that is less than one year old at the time of the hunt.

A cow is a female moose that is at least one year old at the time of the hunt

A bull is a male moose that is at least one year old at the time of the hunt.

What is a moose validation tag?

A validation tag is a permit allowing the recipient (or members of the recipient's party if hunting in a party) to harvest an adult moose under certain specified conditions. The conditions state the WMU to which the tag applies, the season (either the gun season or the archery season), the sex of the adult moose, and any firearm restrictions (rifle, shotgun, bow, muzzle-loader) which may apply to the hunter. Non-resident tags include additional information.

The number of validation tags available in a WMU is related to the number of adult moose MNR biologists calculate can be harvested, while retaining enough breeding animals to allow the herd to replace the number removed from the population. Because the number of Ontario residents wishing to hunt adult moose is greater than the number of tags available, validation tags are allocated in computerized draws. Ontario residents wishing to apply to the draw should use either the toll-free telephone application system* or the Resident's Application for a Moose Validation Tag that is attached to the moose licence. The deadline by

How do you tell a calf moose from a cow moose?

Short face a small nose and a "short alone. face."

Seldom alone

Body proportions Calf moose appear to have Calf moose are seldom. Calf moose appear to have more leg than body and their hindauarters appear slender.

Shoulder Height Shoulder height of cow moose is six feet (2 m) and of calf moose is four feet (1.3 m)

which a telephone application must be made is 11:55 p.m. (EDT) on Wednesday, May 15, 2002. (If you plan to apply by telephone do not leave your call until the day of the deadline! If you wait until the last day and cannot get through because the lines are busy, you will not be able to enter the draw. The earlier in the application period you apply, the easier it will be to connect to the system on your first try.) The deadline by which a carefully and completely filled out paper draw application must be received at a MNR office is 5:00 p.m. on Wednesday, May 15, 2002.

* Complete information on the new telephone application system for the 2002 moose draw was mailed to all hunters who purchased a moose licence in 2000 or Application System for the Moose Validation Tag Draw, is available at MNR offices and on the Internet at www.mnr.gov.on.ca/MNR/pubs/pubmenu.html.

What are the different ways a resident of Ontario may apply to the draw for a validation tag to hunt adult moose?

Residents of Ontario who have a valid hunting version. Outdoors Card and have purchased a moose licence, may enter the draw for a validation tag to hunt adult moose:

- · as a member of a group; or,
- · as an individual hunter.

If the hunter fails to get a tag through the draw process, another option is to hunt with an outfitter who has adult validation tags available for guests and who is accommodating the resident hunter as a registered guest.

NOTE: A hunter cannot have more than one moose adult validation tag at the time of the hunt.

What are the benefits to applying as a group?

If you party hunt, it is always better to apply as part of a group.

More than 60 per cent of all group applications were successful in the 2001 draw, compared with only 18 per cent of individual applicants.

Applying in a group - no matter what size (maximum of 10) - increases every hunter's chances of obtaining an adult moose tag for their party. Group applications allow tags to be spread out more evenly among hunting parties. This increases everyone's chance of having an opportunity to hunt adult moose.

If your group is too small to meet the Guaranteed Group Size or the Hunter: Tag Ratio, all members of your group will have, at the very least, the same chance they would have had if they all applied to the draw as individuals.

Applying in a group ensures that your party will not receive more tags than they can use.

Applying in a group provides your party with the best chance of getting one tag while keeping as many hunters as possible in Pool 1 for the next year.

Applying in a group means if the tag holder is unable to go hunting, the tag can be transferred to a group member. (Individuals are never permitted to transfer their tag to another person.)

So go for a group!

See "Should I apply in a group?" (page 33).

ATTENTION HUNTERS

If you kill any animal that is carrying ear tags, a radio collar or any other marking or scientific device, please report the details as soon as possible to the nearest MNR office Hunters will NOT be penalized in any way for legally harvesting such an animal. On the contrary, the information that you supply by returning the devices will contribute to the collection of valuable information on the animals being studied and is much appreciated.

How do I know what "pool" I am in for tag application purposes?

All applicants to the draw for a moose validation tag are in either Pool 1 (also called the preferred pool) or Pool 2 (also called the non-preferred pool). Knowing what pool you (and members of your group) are in is important information because only Pool 1 hunters count when determining the size of your group.

You are in Pool 1 if you applied on time for the draw in 2001, and were unsuccessful in getting a tag. You are in Pool 2 if you received a moose tag in the 2001 draw, received a tag through a transfer in 2001, or if you did not apply to the draw in 2001. Simply purchasing a moose licence last year does not qualify you for Pool 1 this year.

Beginning in the fall 2001 hunt, hunters who have transferred tags in two consecutive seasons will be placed in Pool 2 for the following year's draw. This means that if a hunter transferred a tag in 2000, and again in 2001, he/she will be placed in Pool 2 for the 2002 draw. This change is being made as a result of an increasing number of hunters repeatedly transferring tags. As before, the recipient will be placed in Pool 2.

See. "How do I know what Pool I am in for the 2002 moose draw?" (page 33).

How do I stay in Pool 1 for next year if I know I cannot hunt this year?

Some hunters who are eligible for Pool 1 know they will not be able to participate in the moose hunt this year, but want to ensure they are in Pool 1 next year. There are two ways to ensure you do not get a tag this year when you apply for

the draw, so that you can retain your Pool 1 status for the next year's draw.

You can:

- submit a paper draw application and apply for WMU 99Z (this is not a real WMU so you will not be issued a
- submit a paper draw application and leave your choice of WMU and season blank.

What is the guaranteed group size method of applying to the draw?

In many WMUs, an adult moose validation tag will be guaranteed to a group of hunters when the number of Pool 1 hunters in the group meets a pre-determined size. This is known as the "guaranteed group size".

The actual size of the group required varies:

- from WMU to WMU;
- according to the sex of moose preferred; and,
- in some WMUs according to the firearm preferred by the group (gun or bow).

The pre-determined guaranteed group sizes are listed each vear in the Hunting Regulations Summary, so hunters may use this information when applying to the draw for adult validation tags each May (see Table 1 on page 35.)

Remember, only Pool 1 hunters count when determining the group size.

If you have enough Pool 1 hunters in your party to meet the guaranteed group size in the WMU, sex and season choice for the type of tag your party wants, you should apply to the draw as one group. Be sure to apply for the guaranteed tag (WMU and bull/cow) as your first choice if it is your preference. If applying by telephone, keep a record of your Group Reference number (group leaders only) or your Authorization Number (group members and individual applicants). If applying by paper, keep a record of your group application number (printed in red on the back of the Group Application Envelope.)

How is the guaranteed group size determined?

The 2002 guaranteed group size is calculated for each WMU, sex and season choice. The "potential" number of Pool 1, Choice 1 (P1C1) applicants to the 2002 draw is estimated by adding together the 2001 P1C1 applicants and Pool 2, Choice 1 (P2C1) applicants, and subtracting the 2001 tag quota. Then, this number of "potential" P1C1 applications is divided by the new 2002 tag quota. The result is the 2002 guaranteed group size.

We want to party hunt, but our group is smaller than the guaranteed group size. How should we apply?

If you hunt in a party it always makes sense to apply as a

Even if you do not have enough Pool 1 members to guarantee a tag - or if there is no guaranteed group size for your WMU - by applying as a group you will be in the draw at two tag allocation steps: the Large Group Allocation and the Random Allocation. If your party members were to apply as individuals, they would be eligible for the Random Allocation portion of the draw only - missing their chance at the tags allocated to groups meeting the Hunter: Tag Ratio in the Large Group Allocation step of the draw.

All hunters in group applications will have at least the same chance to receive a tag that they would have if they applied individually.

Do individual hunters have a chance for a tag?

Big game in Ontario has traditionally been hunted by groups of hunters for social, cultural and practical reasons. Ontario's moose tag allocation system is designed to allow this traditional harvest method to continue, and permit the greatest number of hunters to benefit.

While it makes sense to apply as part of a group if you hunt in a party, individuals may also apply for a tag. Individual hunters are eligible for a tag in the Random Allocation step of the draw. The odds of an individual hunter receiving a tag in any given WMU last year are listed on Table 3 the 2001 Moose Gun Tag Draw - Individual's Chance at Each Draw Step, found on page 37. Hunters are encouraged to examine these numbers before applying for the 2002 moose tag draw.

Hunting parties who apply as individuals and receive more tags than the party wants are not permitted to return tags.

What should I know about bow hunting for moose?

Hunters who wish to hunt adult moose during the bows-only season must have an adult validation tag issued for the bowsonly season. These tags may be used only for the bows-only season; they become invalid at the end of the bow season. Hunters without an adult validation tag may hunt for calves with a bow during the bows-only season provided they comply with all other legal requirements for bow hunting (except for WMU 65, see page 29).

If you have not harvested an adult moose during the bowsonly season, you may still hunt using any legally allowed firearm during the regular gun hunt. However, your moose licence will be valid for calves only.

Can I party hunt for moose?

Party hunting for moose is allowed. The number of bull, cow and calf moose taken must not be more than the number of bull and cow validation tags and valid moose licences held by members of the party. Any member of the party may take the animal. The total number of moose taken by the party may not exceed the number of game seals held by party members. (See Glossary for the definition of party hunting, page 85.)

Understanding the Moose Validation Tag Draw

It is to each hunter's advantage to understand how moose tags are allocated.

Though the process is often referred to as a draw, there are actually many draws performed in the allocation of tags.

Some units have both a gun season quota and an archery season quota. In these units, separate draws are run for bull gun tags, bull archery tags, cow gun tags, and cow archery tags. These WMUs include: 2, 3, 4, 5, 6, 7B, 8, 9A, 9B, 11A, 12A, 12B, 13, 14, 15A, 15B, 18A, 19, 21A, 21B, 23, 24, 29 and 38. When hunters apply to the draw in these WMUs they must select the corresponding Hunt Code if applying by telephone. If applying by paper application, they must check the Special Bow Season Preference box on the application if they want an archery season tag. WMU 18B has a combined archery/muzzle-loader quota.

Other units have both an archery season and a gun season for moose, but only one tag quota for bulls and one tag quota for cows. Included in this group of WMUs are: 22, 27, 28, 30, 31, 32, 33, 39, 40, 41, and 42. When hunters apply to the draw in these WMUs they must check the Special Bow Season Preference box on the application if they want an archery season tag. Like other archery season tags, these tags are only valid during the bows-only season.

WMU 65 in southeastern Ontario is a special case. See page 29 for more information.

In most WMUs you must be in Pool 1 to have a chance of receiving a tag.

During the initial group allocation stages, it is only Pool 1 hunters who count when determining a group's size.

There are three steps in each draw:

- the Guaranteed Group Allocation;
- the Large Group Allocation; and,
- the Random Allocation.

All steps are performed by computer. The computer allocates tags to both groups and individuals in the following sequence:

- Pool 1, Choice 1 (P1C1)
- Pool 1, Choice 2 (P1C2)
- Pool 2, Choice 1 (P2C1)
- Pool 2, Choice 2 (P2C2)

Step One: Guaranteed Group Allocation

In Step One, each group meeting the Guaranteed Group Size requirement (valid applications from a group with enough Pool 1 hunters to meet or exceed the Pool 1. Choice 1 Guaranteed Group Size listed in Table 1, on page 35) and

who makes this their first choice, is allocated one tag for the unit, sex of moose and type of firearm selected by the group. The tag is randomly assigned to a Pool 1 member of the group and another Pool 1 hunter, is designated as the alternate. All the members of these "guaranteed groups" are then removed from the draw.

Step Two: Large Group Allocation

Next, the Large Group Allocation of tags is performed.

At this step, the computer calculates the number of applicants left in the draw and compares it to the number of tags still available. The ratio is called the Hunter: Tag Ratio. Each group whose number of Pool 1 applicants is equal to or greater than the Hunter: Tag Ratio is issued one tag and removed from the draw. The tag is randomly assigned to a Pool 1 member of the group and another Pool 1 hunter is designated as the alternate. (Example: If at the Large Group Allocation stage there are 600 hunters left, and 104 tags available, the Hunter: Tag Ratio is 5.7. All groups with six or more Pool 1 hunters will be issued a tag.) All members of these successful "large groups" are then removed from the draw.

Step Three: Random Allocation

Next, the draw proceeds to the Random Allocation.

At this step, all remaining Pool 1 applicants (all individuals and every member of the remaining groups) who have this WMU and sex of moose as their first choice, are eligible to receive one of the remaining tags in a random draw. If a tag is allocated to a member of a group at this stage, the rest of the group members are removed from the draw.

This way of issuing tags makes sure that everyone gets a chance in the draw regardless of whether they applied as an individual or a group.

If there are still tags available, the Large Group Allocation and the Random Allocation are repeated for Pool 1, Choice 2 hunters, then Pool 2, Choice 1 and Pool 2, Choice 2.

In most WMUs, only hunters in Pool 1, Choice 1 will have a chance to receive a tag. The Guaranteed Group Allocation is performed only for Pool 1, Choice 1 applicants.

POACHING IS STEALING

Report violations immediately to the nearest MNR office. the Ontario Provincial Police or the local police or Crime Stoppers at 1-800-222-TIPS. The penalty for a violation of the Fish and Wildlife Conservation Act is up to \$25,000 and/or one year imprisonment and, in the case of a conviction for careless hunting, may also involve imprisonment up to two years. For convictions relating to commercial activity, the maximum fine is \$100,000 and up to two years imprisonment.

How to Maximize Your Chances of Success in the Moose Tag Draw

Review the open season dates table, the moose quota table, and if you are hunting in a group, the guaranteed group size table. Using this information, determine your first and second choices of WMU, sex of animal, and firearm type. If hunting in a group, contact all group members and decide whether you will all apply by telephone, or if you will all apply by paper application. (All group members must use the same method.) Choose one method only – you will be disqualified if more than one application is submitted in your name.

Your Telephone Application

The telephone application system will allow you to both purchase a moose licence and apply to the draw. Do not use the telephone application system if you have already purchased a paper moose licence.

If your Outdoors Card has expired, you must renew it before you use the telephone application system. The quickest, most convenient ways to renew are:

- with a call to the toll-free, automated Outdoors Card renewal line at 1-800-288-1155; or,
- by connecting to the Internet renewal site at http://outdoorscard.mnr.stores.gov.on.ca.

Once you have successfully completed your renewal by either method, you may proceed immediately to the telephone application system for the moose draw.

For more information on renewal options, see page 7.

If your Outdoor Card is valid but you have moved since you received it, call the Outdoors Card Centre at 1-800-387-7011 or go on the Internet at: http://outdoorscard.mmr.stores.gov.on.ca and provide your current address. This will ensure that you receive your licence (and tag if you are successful in the draw).

To purchase a moose licence and apply to the draw, assemble the items you will require before beginning your call. You will need your Outdoors Card number, your credit card, and a copy of the brochure entitled 2002 Telephone Application System for the Moose Validation Tag Draw containing instructions, worksheets and a list of Hunt Codes. Completing the worksheet before you call will assist yoù with the telephone application system.

If you are applying as a member of a group, decide with your group **before you call** who will be the Group

Leader and who will be the Group Members. Then, ensure that all Group Members are told the Group Reference Number (which is provided to the Group Leader) so they can successfully complete their call.

As telephone application systems become more common in the big game draw program, we offer these tips to help hunters identify and take advantage of the times when call volumes are usually lower. Keep these guidelines in mind when planning your call:

- the telephone application system is available 24 hours a day, seven days a week, until 11:55 p.m. on the day of the deadline for applications;
- do not leave your call until the day of the deadline!
 The earlier in the application period you apply, the easier it will be to connect to the system on your first try;
- telephone on a weekend, if possible. We often experience lower call volumes on weekends; and,
- on weekdays, our telephone lines are generally less busy early in the day and late in the day.

The deadline for applying to the moose draw by telephone is 11:55 p.m., (EDT) Wednesday, May 15, 2002.

Remember, do not apply by telephone if you have already submitted a paper application.

Your Paper Application

You must be in possession of a valid hunting version Outdoors Card to purchase a moose licence, and you must have a moose licence in order to apply to the draw with a paper application. If your Outdoors Card has expired, renewing it is the first step in this process. To review your renewal options, see page 7.

A paper application for the moose draw comes attached to the moose licence. Ensure that the Outdoors Card number imprinted on your application for the moose draw is legible. If any portion of the imprinted number is not clear, write it neatly in the space provided at the top of the application.

Fill out the application form carefully and completely.

Write in a valid WMU and check off a valid sex of moose (occasionally a WMU will offer a season on one sex only). If you do not select a WMU and a sex of moose, your application will be rejected. If there is an archery season in your WMU as well as a gun season, and you wish to apply for the archery hunt, select the box labeled "Special Bow Season Preference".

You are not required to indicate a second choice on your application if you do not have a second choice. If you are applying for a guaranteed group size tag, be aware of the status of each applicant (Pool 1 or Pool 2). size. Including Pool 2 applicants in your group won't hurt

If you are applying in a group, keep a record of your group application number (found on the outside of the Group Application Envelope provided by the MNR). This number must appear on the application of each person in the group.

The group leader should complete the outside of the Group Application Envelope before mailing. The information you write on the envelope overrides any information contained on the paper applications inside the envelope.

Ten is the maximum group size for a draw application. Do not include more than 10 applications in the Group Application Envelope.

Submit your paper draw application well before the 5:00 p.m., Wednesday, May 15, 2002, deadline. Remember that the deadline is the date and time by which your application has to be in MNR hands. This deadline is NOT a "post-marked by" date. Whether an application is delivered by courier, registered mail or through the regular or government mail, please allow at least five working days for its delivery. All applications not received by 5:00 p.m., Wednesday, May 15, 2002, will be rejected from the draw without exception.

Remember, do not submit a paper application if you have already applied to the draw by telephone.

You will be disqualified from this year's draw if:

- more than one application is submitted in your name;
- · your Outdoors Card is not valid;
- the application is not complete;
- the writing is not legible;
- the application is received late; or,
- your hunting licence privileges are under suspension.

The responsibility for entering a valid application rests with the hunter. If you have any questions about applying to the moose draw, contact a MNR office.

Draw Results Telephone Line

Draw applicants may call the toll-free Draw Results Telephone Line at 1-800-288-1155 to determine the results of the Adult Moose Validation Tag Draw. This automated line runs 24 hours a day, seven days a week from August 1 until December 31. Hunters will need their 15-digit Outdoors Card number to access their draw record. Using the Draw Results Telephone Line is the quickest, easiest way to find out if you were successful in the draw.

The Mailing of Tags

Only successful draw applicants, and those hunters who used the telephone application system to purchase their moose licence, will be notified by mail. If you have called the Draw Results Telephone Line and you were successful in the draw but have not received your validation tag, (or if you purchased your licence by telephone, and you have not received your licence), contact the MNR office which serves your area. You can get a duplicate validation tag or licence and validation tag through your ministry office only after signing a declaration and verifying your address information. There may be a charge for this service. After the season starts, duplicate tags will be issued only at the discretion of the ministry.

Everything You Wanted to Know About Tag Transfers

- Hunters who apply to the draw as individuals are never permitted to transfer tags to other hunters.
- Groups are permitted one transfer only. The transfer is granted only to the alternate tag transfer recipient in your group who was randomly selected by the computer during the draw. Once the original tag recipient transfers the tag to the alternate, the tag cannot be transferred back to the original recipient or to anyone else.
- The transfer of a tag from the original recipient to the designated alternate is granted by a MNR office provided a valid transfer application is submitted, the original tag is returned to the MNR at the time of the request, and the moose season has not yet opened. The fee for transferring a tag is \$10.00.
- To determine who the alternate tag transfer recipient is for your group, look at the lower half of your validation tag. Inside the brackets ({ }) it will show the moose licence number of another Pool 1 member in your group. This moose licence number belongs to your group's designated alternate tag transfer recipient selected randomly by the computer.
- Tags can be transferred to a Pool 2 hunter only if the tag is for a WMU where a Pool 2 hunter actually had a chance to receive a tag in the draw.
- · After the season opens, a tag can only be transferred if the current tag holder is medically unfit to participate in the hunt, as proven by a doctor's certificate.
- Hunters who receive tags through a transfer will be placed in Pool 2 the following year. Most hunters who have transferred tags to another group member will be placed in Pool 1 in the following year's draw. However, beginning in the fall 2001 hunt, hunters who have transferred tags in two consecutive seasons will be placed in Pool 2 for the following year's draw. This means that if a hunter transferred a tag last year (2001), and if successful this year (2002) wants to transfer again, he/she will be placed in Pool 2 for the 2003 draw. This change is being made as a result of an increasing number of hunters repeatedly transferring tags. As before, the recipient will be placed in Pool 2.

Special Opportunities for Moose Hunters With Lower Limb Disabilities

Hunters who qualify for these special seasons include:

- · a paraplegic or hemiplegic;
- a person with a single (above the knee) lower limb amputation, or a double (below the waist) amputation;
- a person who suffers severe disability and cannot bunt without the use of a wheelchair or similar means of locomotion. In this case the hunter must provide a medical certificate stating the disability.

Northwestern Ontario

A special moose season for hunters who qualify in one of the categories of mobility impairment listed above will be held before the regular gun hunt in WMU 11B. A limited number of opportunities are available in 2002. Those hunters wishing to hunt for an adult moose in this WMU during this special season must apply to the regular draw for a validation tag.

The first openings in the hunt will go to hunters who qualify and hold an adult moose validation tag for WMU 11B. Remaining opportunities will be available to hunters who qualify and who are interested in hunting calves.

For more information regarding this hunt, please contact the MNR Thunder Bay District Office, 435 James Street South, Suite B001, Thunder Bay, Ontario, P7E 6S8, telephone: (807) 475-1462.

Southeastern Ontario

A special bows-only moose hunt for hunters who gualify in one of the categories of mobility impairment listed above will be held October 5-7, 2002, in WMU 65. The number of opportunities available is limited.

Hunters wishing to participate in this special hunt must apply to the regular draw and receive a validation tag in WMU 65. Mobility impaired moose hunters will be able to participate in the early mobility impaired season (October 5-7) as well as the regular archery hunt which follows (October 8-14).

For more information, please see "Special Conditions for WMU 65 Moose Hunters" on page 33. If you have questions, please contact the MNR Kemptville District Office, at Postal Bag 2002, Concession Road, Kemptville, Ontario, K0G 1J0, or telephone (613) 258-8204.

Information for Non-Residents Wishing to Hunt Moose

A non-resident who wishes to hunt moose in Ontario must have valid hunting accreditation and be a registered guest and actually accommodated at a tourist establishment. The outfitter must apply for and receive, on the non-resident's behalf, a validation tag to hunt moose.

A non-resident's licence to hunt moose is not valid unless it has a bull, cow or calf tag affixed to it. The non-resident can only hunt moose of the age and sex specified on the validation tag.

Exceptions are:

- · Non-residents who hunt with an immediate relative who is an Ontario resident licensed to hunt. moose in a Wildlife Management Unit (WMU) that has an open season for non-residents. Immediate relative when used in reference to a person, means that person's grandparent, parent, spouse (or same-sex partner), child, sibling or grandchild.
- Non-residents who are owners of land in a WMU that has an open season for non-residents and wish to hunt in that WMU (excluding WMU 7B, 9B 11A, 11B, 12B, 13 and 14). Please note: Nonresident moose hunters may hunt moose in WMU 7B, 9B, 11A, 11B, 12B, 13 and 14 only by hunting through a tourist outfitter or by hunting with an immediate relative (as defined above) who is an Ontario resident licensed to hunt moose.

Non-residents who qualify under either of these two exceptions may apply to the residents' tag draw in certain areas by purchasing a moose licence and submitting an application to the Ministry of Natural Resources office that has jurisdiction in the WMU in which they wish to hunt (see MNR offices and WMU listings, page 86).

Please note that WMUs 46-63 and 65 do not have a moose season for non-residents.

A non-resident may hunt in a party for moose when hunting in a WMU that is specified on the validation tag and that has a non-resident season. The party hunting must be carried out in accordance with the definition of party hunting on page 30. The number of bull, cow and calf moose taken must not be more than the number of bull and cow validation tags and valid moose licences held by members of the party. Any member of the party may kill the animal. The total number of moose taken by the party may not exceed the number of game seals held by party members.

Party Hunting for Moose

The term "party hunting for moose" means two or more persons hunting moose during an open season for moose under the following conditions:

- each person has a valid licence to hunt moose;
- each person has agreed to hunt moose co-operatively during a period in an area that can reasonably be hunted by the persons during that period so that the intended objective of the hunt can be achieved:
- the total number of moose killed by the party does not exceed the total number of game seals held by the members of the party licensed to hunt; and,
- the total number of moose of a specified sex or age killed by the party does not exceed the total number of game seals validated for that sex or age that are held by members of the party.

A person may hunt in a party even if the person has previously attached his or her seal to a moose.

CADMIUM

The Ministry of Natural Resources recommends that people not eat the liver and kidneys of moose and deer because of the concerns about cadmium levels in these internal organs. For further information, please contact an MNR office.

Sealing and Transporting Moose

The moose validation tag, in the case of resident hunters, must be affixed to the recipient's game seal before hunting begins. In the case of non-resident hunters, they must affix their validation tag to their moose hunting licence.

If hunting moose glone:

When a moose has been killed, the licence holder who shot the moose must, **immediately** after the kill and at the kill site, securely attach the game seal to the animal in the manner described on the seal.

You must notch out the month, date and time of kill on the game seal.

If party hunting for moose:

When a moose has been killed, the shooter or a member who is hunting in the party, whose licence has been validated for hunting moose of the age and sex of moose that was killed, must immediately after the kill and at the kill site, securely attach the game seal to the animal.

SEALING MOOSE

As part of the Selective Harvest Program, validation tags are issued for a specific age and sex of moose. You must have evidence of the age and sex of any moose that you kill.

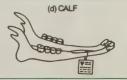

FOR BULL OR COW MOOSE: Cut to one side of the scrotal sac or vulva when opening the animal for gutting as shown with the dotted line in illustrations (a) and (b). Leave the scrotal sac or vulva attached by connective tissue. Then attach the seal to the tendon of the hind leg – illustration (c) – to which the scrotal sac or vulva is attached. Note the location of the tendon in illustration (b). To prevent the loss or the damage of the seal (torn off) it could be protected by making a slice in the hide, tucking the seal under the skin and wrapping with tape.

FOR CALVES: Attach the seal to the lower jaw – illustration (d). The lower jaw must be kept whole (i.e., the two sides must not be separated). You do not need to provide any proof of sex of calves. The lower jaw may be removed from the head as long as it is kept whole.

Only the hunter whose game seal is to be used is allowed to attach the game seal to the moose. It is illegal to transfer a game seal in order to seal a moose.

You must notch out the month, date and time of kill on the game seal.

For a bull or cow moose: attach the game seal to the tendon of one of the hind legs to which the scrotal sac or vulva (as shown on the seal) is attached by the connective tissue. The game seal and proof of sex must remain attached to the animal while it is being transported. See page 30 for a diagram of where to attach the game seal.

For a calf moose: attach the game seal to the complete lower jaw. You may remove the complete lower jaw from the head. The game seal and jaw must accompany the animal while it is being transported. See page 30 for a diagram of where to attach the game seal.

If you are transporting part of a moose, you must know, and be prepared to state:

- the name of the hunter who sealed the animal:
- the hunting licence and validation tag number under which the animal was claimed; and,
- the WMU in which it was taken:

if requested to do so by a Conservation Officer.

If you have questions about moose hunting in Ontario, call the Ministry of Natural Resources. A complete list of Ministry offices and phone numbers can be found on page 86.

Correction Notice

Moose hunters who have purchased the 2002 Fish and Wildlife Calendar please note: The message 'Central Ontario moose season begins'

should have appeared on Monday, October 21st. not on the 14th.

We apologize for any inconvenience this error may have caused.

Moose Hunter Education

MNR in partnership with Ontario Federation of Anglers and Hunters have produced two manuals: Book 1 -Moose Biology, Ecology and Management, and Book 2 -Moose Hunting Techniques, Hunting Ethics and the Law.

Each two volume set is available for \$10.65, tax included. To cover shipping charges, please include \$2.50 if ordering fewer than 10 sets of books; \$5.00 for 10 to 49 sets; and \$10.00 for 50 or more sets. To order using a credit card, please call (416) 314-2000 or send a cheque payable to Ontario Minister of Finance to this address.

Ministry of Natural Resources 300 Water Street, P.O. Box 7000 Peterborough, Ontario K918M5

A 90-minute video on moose hunting has been produced for moose hunters. Moose Hunt - A Guide To Success covers such topics as equipment, tracking, calling, and field dressing. It may be purchased for \$59.99 including taxes and shipping. To order using a credit card, please call the OFAH at (705) 748-6324 or send a cheque payable to:

Ontario Federation of Anglers and Hunters P.O. Box 2800 Peterborough, Ontario K918L5

HELP THE MINISTRY COLLECT AGE INFORMATION ON MOOSE

Moose hunters in selected areas of the province are encouraged to provide information on the age of their moose at checkstations, some MNR offices and some hide depots in the area of their hunt. Please contact the MNR office in the area you will be hunting to determine if the lower jaw is required, and where and when collection centres are operating.

2002 Moose Seasons

RIFLES, SHOTGUNS, ARCHERY AND MUZZLE-LOADERS

WMU(s)	Resident - Open Season	Non-resident - Open Season	Conditions (Restrictions Only)

Proposed new archery moose seasons in WMUs 35, 36, 37. Contact Sault Ste. Marie District Office for details.

2002 MOOSE HUNTS WITH CONTROLLED HUNTER NUMBERS*

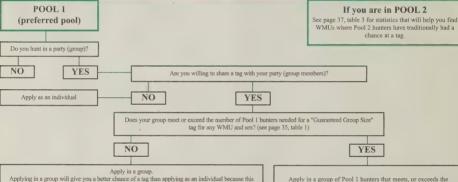

WMU(s)	Resident - Open Season	Non-resident - Open Season	Conditions (Restrictions Only)
65	Oct. 5 - Oct. 7	No season .	Must have lower limb disability (see definition of lower limb disability on page 29). Eligible hunters must obtain a tag through the draw if they wish to hunt moose. Only archery may be used. Written landowner permission required.
65	Oct. 8 - Oct. 14	No season	Only archery may be used. Written landowner permission required.

^{*} All hunters must obtain a WMU 65 validation tag, or be the partner of a hunter who has obtained a WMU 65 validation tag, before they can hunt any moose (adult or calf) in WMU 65. See page 33, "Special Conditions for WMU 65 Moose Hunters."

How do I know what "POOL" I am in for the 2002 moose draw?

Should I apply in a group?

gives you a chance in the Large Group Allocation stage of the draw. If there is no Large Group Allocation, all your group members will still be entered in the Random Allocation and have at least the same chance for a tag as an Individual. (see page 26, steps 2 and 3 of the draw)

Apply in a group of Pool 1 hunters that meets, or exceeds the guarantee for your chosen WMU and sex of animal and select it as your first choice.

Special Conditions for WMU 65 Moose Hunters

There are two seasons for hunting moose in WMU 65; both are for archery equipment only.

There is a three-day season (October 5-7) open to mobility impaired persons meeting the definition of disabled as set out in Section 93 of Ontario Regulation 665/98 (see page 29). Mobility impaired hunters holding a validation tag in WMU 65 may use their partner tag during the early mobility impaired season (October 5-7) to invite a partner to hunt with them.

This is followed by a seven-day season (October 8-14) open to all resident hunters who receive a validation tag.

Hunters wishing to hunt moose in WMU 65 must apply to the moose draw and be successful in the draw. Applicants successful in the draw will be eligible to receive a partner tag which allows the holder of the validation tag to invite another licensed moose hunter to hunt as a member of the party.

Hunters may hunt alone or in a party of two. Hunters must possess a validation tag (or hunt in a party of two as a partner with someone who has a validation tag) to hunt moose.

Tags will allow for hunting either an adult male or calf moose, or, an adult female or calf moose. The limit is one moose per validation tag.

Only the holder of the validation tag authorizing the holder to hunt moose may attach this seal to a harvested moose. Persons hunting under a partner tag may not seal a harvested moose while hunting in WMU 65.

No person shall use, or be accompanied by, a dog while hunting moose in WMU 65.

Moose hunters hunting on private land (other than their own land) will require the written permission of the landowner on the Landowner Consent form provided by MNR, and must carry that permission on their person when hunting. Please note that Agreement Forests such as Larose Forest are considered private land. Please contact these landowners for permission; some fees may apply.

Every person who receives a validation tag to hunt moose in WMU 65 must complete and return a survey card reporting on their hunting activity within 14 days of the close of the hunt. Failure to comply with this regulation may result in charges and/or disqualification from future hunts.

WOODLAND CARIBOU

any hunters may not be aware that we have four members of the deer family in Ontario - white-tailed deer, moose, the elk or wapiti and woodland caribou. Depending on where you are hunting in the province, you may see any one or more of these species. Woodland caribou is the only one of these species in which both males and females may have antlers.

There is no open season for elk or caribou in Ontario. Ontario's woodland caribou that live south of the Hudson Bay Lowlands are considered part of the boreal population, which has been designated as "Threatened" by the Committee on the Status of Endangered Wildlife in Canada (COSEWIC).

Woodland caribou are an important component of northern forest ecosystems. They once ranged across much of northern Ontario as far south as the French River. Several factors have worked together to reduce caribou numbers and the range they inhabit. These include habitat changes, increased human access and disturbance, and increased predation resulting from changes in the predator-prey balance as a result of these habitat changes. Caribou range has been receding northward for more than a century. They are still found in northern forests across Ontario from the Manitoba to the Quebec borders, and are occasionally seen by hunters and other forest travellers. They are secretive and elusive animals, and a caribou sighting is a rare and memorable event.

The Ontario Ministry of Natural Resources is committed to conserving caribou and their habitat wisely now and into the future across Northern Ontario. Reports of caribou observations provides important information on distribution and habitat to wildlife managers. Hunters can help us to manage Ontario's caribou population by reporting sightings to a local MNR office, and by being sure of their target when hunting.

Species at risk - act today so they have tomorrow

Youth

Employment

Making a difference...

Youth Employment Programs play an important role in Ontario's Wildlife Management

Toung people, working in the Ministry of Natural Resources' Youth Employment Programs, completed hundreds of wildlife projects across Ontario in 2001.

Major projects completed this year include habitat work. This helps waterfowl by:

- Creating better nesting areas
- Removing non-native plant species

Enhancing natural diversity

Elk restoration and woodland caribou recovery projects also benefit from the work done by young people. They have assisted in tracking and monitoring elk and caribou. They have also helped in determining elk locations using radio telemetry. This research helps MNR to:

Establish survival rates

Gather data on habitat of elk and caribou

Other ways Ontario's young people are involved include creating nesting areas for wood ducks by building wood duck boxes. They are also participating in species at risk projects that benefit all wildlife. Many of these young people are involved in collecting and analysing data on plant and animal species and their environments. This helps MNR with:

- Life science studies on wetlands
- Population surveys
- Mapping projects
- Planting trees and vegetation

Youth in these programs work with and learn from involved partners, conservation authorities and agencies, fish and game clubs, provincial parks and MNR staff.

Over 2,300 young people were involved in the following programs: Internship, Co-op, Ontario-Quebec Exchange, Summer Experience, Ontario Rangers, and Ontario Stewardship Rangers.

If you know a young person who is looking for a job in the year 2002, and who is interested in the outdoors and in natural resource management, please pass this information on to them. Learn more about MNR'S Youth Employment Programs by visiting our Web site or by calling us at 1-800-667-1940 (1840 for French).

YOUTH OPPORTUNITIES ONTARIO If you want to work, we want to help

ATTENTION HUNTERS

When you are in the forest you may come across burning piles of logging debris and brush known as slash piles.

Slash pile burning is an approved forest practice which is carried out in order to prepare thousands of hectares for replanting and reduce the risk of wildfires during the spring and summer months. Slash from logging operations is piled along the roads and is burned during the fall. The burnt piles may smoulder for many days but are monitored by trained personnel.

If you would like to know whether slash pile burning operations will be going on where you hunt, contact the local MNR district office or the office of the company that holds the Sustainable Forest License (SFL) for that area. The Slash Pile Burn Plan and a map of the sites to be burned are available for viewing at both these locations.

If you see uncontrolled burning, you can help by reporting the details to the nearest forest company office or by calling the numbers indicated on the map.

The Abuse of Natural Resources. What Can You Do About It?

There is obviously a limit on the number of birds, animals, fish, and other resources that may be available for our use. If we take more than this limit, we threaten the sustainability of our resources.

MNR ensures that this does not happen by creating laws that make certain that natural resources are sustained for the future. We know approximately 90 per cent of all hunters comply with the regulations.

However, people who break protection laws:

- · Steal opportunities to harvest fish and game;
- · Steal opportunities to enjoy the outdoors;
- · Create negative images of resource use among the public.

How Can You Help Stop Resource Abuse?

- · By not looking the other way;
- · By not staying quiet
- . By "getting involved"

Crime Stoppers calls are all anonymous. Crime Stoppers does not subscribe to call display. Crime Stoppers pays cash rewards up to \$1,000.00.

Is there any reason to allow your natural resources to be stolen?

How can you stop resource abuse? By Calling

1-800-222-TIPS (8477)

By calling Crime Stoppers, you accept your responsibility to protect natural resources and the opportunity to enjoy them, for present and future resource users.

Elk are being restored in Ontario

Watch for similarities and differences between ELK and WHITE-TAILED DEER.

A 5- to 6- month-old elk calf will be about the same size as an adult white-tail doe.

Similarities & differences:

ELK CALVES & WHITE-TAIL DOES:

A 5- to 6- monthold elk calf will be about the same size as an adult white-tail doe.

TAILS:

Elk have a short tail;

Deer have a long tail with a white underside.

SIZE:

Adult Elk stand 1.2-1.5 m (4.0-5.0 ft.)at the shoulders;

Adult Deer stand 0.9-1.1 m (3.0-3.5 ft.) at the shoulders.

COLOURING:

Elk have a tan rump patch, black legs and black neck;

Deer have legs the same colour as their bodies, and a white . throat patch.

ANTLERS:

Elk antlers sweep back:

Deer antlers curve forward.

BE SURE OF YOUR TARGET

Deer Draws, Seasons and Other Regulations

Licence Tag Fees (GST is included in all fees)

You must complete an "Application for a Farmer's Licence to Hunt Deer" form (available from MNR and some licence issuers) to get this licence. This licence tag is valid only in the county (or other jurisdiction as the case may be) in which you reside.

- 4. Non-resident's licence to hunt deer (antlered deer only) \$160.00

Non-resident's Export Permit Fee (also see Export and Shipping) \$35.00

Resident's Export Permit Fee issued at no charge.

DRAW RESULTS LINE: 1-800-288-1155 (available by September 8 for antierless deer; by October 15 for controlled deer hunts). Call toll-free to determine your success in the deer validation tag draw.

Firearms

Big game, including deer, may only be hunted with a firearm (this includes bows).

A rim-fire rifle, a shotgun smaller than 20 gauge when loaded with shot or any shotgun loaded with shot smaller than SG or No. 1 buck cannot be used for hunting deer.

When archery hunting, bows must meet the following specifications.

Crossbows:

- draw length must be at least 300 mm (11.8 in.);
- draw weight must be at least 45 kg (99.2 lbs.);
- bolt head must be at least 22 mm (0.9 in.) at the widest point; and,
- there must be at least two cutting edges of straight, sharp, unserrated, barbless steel.

Longbows:

- draw weight must be at least 18 kg (39.7 lbs.) at draw length of 700 mm (27.6 in.) or less;
- arrow length must be at least 600 mm (23.6 in.);
- arrow head must be at least 22 mm (0.9 in.) at the widest point; and,
- there must be at least two cutting edges of straight, sharp, unserrated, barbless steel.

For information on measuring draw length and arrow length, refer to page 13 under "Firearms".

NOTE: You may not hunt deer while they are swimming.

Export and Shipping

Residents and non-residents must have an Ontario export permit to export deer or any part of a deer from Ontario. You may obtain an export permit from most MNR offices in the area where the animal has been taken. You should obtain the export permit before reaching a border point to avoid any inconvenience. A resident may temporarily transport a deer out of Ontario without an export permit if the resident is on the way to a location in Ontario and does not leave any of the deer outside Ontario.

You must keep the game seal attached to the deer while you are transporting it.

A non-resident must pay \$35.00 for an export permit. Export permits have sub-permits attached to them for exporting a part or parts of the animal for which an export permit has been issued. You may use up to three sub-permits for this purpose. Receptacles containing game wildlife or specially protected wildlife that are being shipped or transported to points inside or outside Ontario must have the names and addresses of the sender and receiver, and a list of the contents written on the outside.

Guides

Non-residents must be accompanied by one licensed guide for each two hunters when hunting deer in the Territorial District of Rainy River. WMUs within the Territorial District of Rainy River include 9B, 10, 11A and part of 7B and 12B.

New 2002 Non-Resident of Canada Crown Land Camping Restrictions - WMUs 6, 7B, 9A, 9B

Effective 2002 for non-residents of Canada, Crown land camping is prohibited within 1 km of the following road systems in Kenora and Fort Frances Districts between October 1 - November 15.

- Hwy 71 and roads branching off of Hwy 71 from Strachan Road to the junction of Hwy 17:
- Hwy 596, Caribou Falls Road and Sand Lake Road and all roads branching off of these roads to the junction of the English River Road;
- · Rush Bay Road and branch roads:
- · Shoal Lake Road and branch roads; and,
- · Gundy Lake Road and branch roads.

For more information contact Kenora District Office at 807-468-2501 or the Fort Frances District Office at 807-274-5337.

Ontario's Deer Hunt

White-tailed deer are abundant in many parts of their Ontario range. Easily available food, mild winters, and the ability to adapt to human encroachment have allowed them to flourish. As a result, much of Ontario is rich in deer hunting opportunities.

There are two types of opportunities for deer hunting in Ontario that involve computerized random draws for validation tags. They are:

- the Antlerless Deer Draw; and,
- the Controlled Deer Draw.

The antlerless deer validation tag program was instituted in portions of Ontario in 1980, when deer populations were at a relatively low level.

The program's purpose is to ensure the sustainability of the herd. Habitat has a limited ability to support deer; this ability is called the carrying capacity of the habitat. Maintaining a deer population within the carrying capacity of its habitat ensures a healthy population with minimal habitat impacts, which ensures sustainability.

The Antlerless Deer Validation Tag Program is used to limit the number of antlerless tags allocated, which controls the number of antlerless deer harvested. If deer populations are low, then the number of antlerless tags offered will be low, to allow the herd to rebuild. As deer numbers increase, the number of antlerless tags offered will increase to control the growth of the herd.

The antlerless deer validation tag program allows any legally licensed hunter to harvest a buck, but an antlerless deer (a doe or fawn) can be harvested only if the hunter or hunting party holds an antlerless deer validation tag.

An antlerless deer is defined as a deer that has no antlers, or has antlers that are less than 7.5 cm (3 inches) in length.

The term "controlled deer hunt" means that the number of deer hunters hunting in a Wildlife Management Unit (WMU) is controlled or limited.

Controlled hunts may be used to meet one or more objectives. Limiting the number of hunters in a WMU is desirable in built-up rural areas to ensure public safety. Controlling hunter numbers in popular units can also prevent overcrowding; this results in a higher-quality hunting experience.

Controlled deer hunts take place in southern and southwestern Ontario. Many hunters refer to these hunts as the "shotgun hunts" because the firearm that is permitted is usually a shotgun or flintlock/percussion cap muzzle-loading gun. While many controlled hunts are "any deer" hunts, some are for antlered deer only.

Additional Game Seals for Deer

Deer populations in southern Ontario have flourished in recent years, leading to significant crop damage and increased deer/vehicle collisions in some areas.

To better manage the white-tailed deer population in specific areas where density is high, a number of MNR offices are now selling a limited number of additional game seals. The availability of additional seals, and the conditions placed on their use, may vary. Please refer to page 61 for a list of the WMUs offering additional game seals in 2002. These game seals will be for sale on a first come, first served basis starting Monday, September 9, 2002. The cost is \$33.00 for a resident and \$160.00 for a non-resident (where non-resident seasons exist).

Party Hunting for Deer

The term "party hunting for deer" means two or more persons hunting deer during an open season for deer under the following conditions:

- each person has a valid licence to hunt deer;
- each person has agreed to hunt deer co-operatively during a period in an area that can reasonably be hunted by the persons during that period so that the intended objective of the hunt can be achieved;
- the total number of deer killed by the party does not exceed the total number of game seals held by the members of the party licensed to hunt that species; and,

 the total number of antlerless or antlered deer killed by the party does not exceed the total number of game seals validated for antierless or antiered deer that are held by members of the party.

A person may hunt in a party even if the person has previously attached his or her seal to a deer.

A person shall not hunt deer in a party during a controlled deer hunt season unless he or she holds a controlled deer hunt validation tag. The exception is a Hunter Apprentice hunting with a Mentor (in which case the Mentor must have a controlled deer hunt validation tag).

Regulations Around Party Hunting

Party hunting for deer is allowed.

The number of antlered or antlerless deer taken by a hunting party (two or more licensed hunters) must not be more than the number of valid licences with game seals and validation tags held by the members of the party. Any member of the party may take as many deer as the party members have unfilled seals and validation tags.

A party member may shoot an antlerless deer for which another party member has a validation tag. The party cannot shoot more antlerless deer than they have validation tags to cover.

Immediately after a kill, the member of your party who has the appropriate validation tag must get together with the shooter so that the tag holder can attach the game seal to the deer in the manner printed on the seal. The tag holder must then "notch out" the date and time of the kill. At this point, party members at the kill site must determine the category of animals that may still be hunted. You must then make sure your other party members, who did not come to the kill site, are informed. The hunter in your party who killed the animal, and the hunter who attached the game seal, may continue hunting, provided other members of your party still possess valid, unused game seals.

If you have questions about party hunting, the best time to get answers is before the hunt begins. Contact a Conservation Officer at the MNR office in the district in which you will be hunting. A list of MNR offices and phone numbers can be found on page 86.

Sealing and **Transporting Deer**

The antlerless deer validation tag must be affixed to the recipient's game seal before hunting begins.

The controlled deer hunt validation tag must be carried by the recipient at all times while hunting in a controlled hunt. Do not affix the controlled deer hunt validation tag to your game seal.

SEALING DEER

Instructions for Attaching the Deer Seal

- 1. Fold the game seal around the base of an antler or slit the ear and pass the game seal through. The tag should not wrap around itself, but rather form a loop.
- 2. Carefully peel the backing off the seal. Keep hair, moisture and debris off the tag.
- 3. Then press the adhesive side on both ends together up to where it wraps around the deer part.
- 4. Notch out the month, day and time of the kill on the deer seal.

If Hunting Deer Alone:

When the deer has been killed, the licence holder who shot the deer must, immediately after the kill and at the kill site, securely attach the game seal to the animal.

You must notch out the month, date, and time of the kill on the game seal.

If Party Hunting for Deer:

When a deer has been killed, the shooter or a member who is hunting in the party whose licence has been validated for hunting deer of the type that has been killed must immediately after the kill, and at the kill site, securely attach the game seal to the animal.

Only the hunter whose game seal is to be used is allowed to attach the game seal to the deer. It is illegal to transfer a game seal in order to seal a deer.

To attach the game seal to an antlered deer, fold the game seal around the base of an antler. The tag should not wrap around itself, but rather should form a loop. Remove the backing and then press the adhesive sides together. Be careful to keep moisture and dirt off the seal.

You must notch out the month, date, and time of the kill on the game seal.

To attach the game seal to an antlerless deer, cut a slit in an ear and carefully pass the game seal through the slit. The tag should not wrap around itself, but rather should form a loop. Then press the adhesive sides together. Be careful to keep moisture and dirt off the seal.

You must notch out the month, date, and time of the kill on the game seal.

If you are transporting **part** of a deer, you must know, and be prepared to state:

- the name of the hunter who sealed the animal:
- the hunting licence number and validation tag number under which the animal was claimed; and,
- the WMU in which it was taken:

if requested to do so by a Conservation Officer.

HELP THE MINISTRY COLLECT AGE INFORMATION ON DEER

Deer hunters in selected areas of the province are encouraged to provide information on the age of their deer at checkstations, some MNR offices and some hide depots in the area of their hunt. Please contact the MNR office in the area you will be hunting to determine if the lower jaw is required, and where and when collection centres are operating.

If you have questions about deer hunting in Ontario, call the Ministry of Natural Resources. A complete list of ministry offices and phone numbers can be found on page 86.

HOW OLD IS YOUR DEER?

1/2 year old

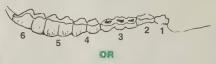

At this age, White-tailed Deer have only four cheek teeth that show little wear.

1 1/2 years old

At this age White-tailed Deer have six cheek teeth. The third tooth is the most important for determining age.

3rd tooth has 3 cups, is well-worn and ready to shed.

3rd tooth is new with sharp crests and no sign of wear.

2 1/2 years old

At this age, White-tailed Deer have six cheek teeth all of which show varying degrees of wear. 3rd tooth shows wear and widening of brown dentine lines.

12 1/2 years old

At this age, White-tailed Deer have six cheek teeth all of which show varying degrees of wear. Extreme wear and brown dentine lines on teeth are evident. The teeth are very close to the gum line.

Antlerless Deer Section

Important New Regulation Change

Changes have been made to the boundaries of WMUs 82A, 83A, and 84. WMU 83A has been reduced in size and is now comprised of the geographic Townships of St. Edmunds, Lindsay, Eastnor and Albermarle. WMU 82A has been expanded to include the geographic Townships of Keppel and Sarawak and WMU 84 has been expanded to include the geographic Township of Amabel. The boundary between 82A and 84 south of Highway 21 is now the Grey Bruce County Line, not the previous boundary of Bruce Road 10

Applying to the Draw for an **Antierless Deer Validation Tag**

Any resident of Ontario who has a valid hunting version Outdoors Card may apply to the draw for an antlerless deer validation tag. Each hunter who receives a tag in the draw is permitted to harvest an antlerless deer in the WMU specified on the tag.

Licensed hunters who do not apply to the antlerless draw, or who are not successful in the draw for an antlerless deer validation tag, may harvest an antlered deer.

Hunters who wish to apply to the antlerless deer draw must first purchase a deer licence. For your convenience, you may purchase your 2002 resident's deer licence tag (the sticker that goes on the back of your Outdoors Card) and apply to the antlerless deer draw in one toll-free call to 1-800-288-1155 between March 1 and July 31. This line is available 24 hours a day, seven days a week.

You may also purchase a deer licence from a licence issuer and submit a paper application for the draw to a Ministry of Natural Resources office.

Your chance of being drawn for an antlerless deer validation tag is the same whether you apply by telephone or by paper application. Choose one method only - you will be disqualified if more than one application is submitted in your name.

The deadline for applications by telephone is 11:55 p.m. (EDT) on July 31, 2002.

The deadline for paper applications to be received at an MNR office is 5:00 p.m. on July 31, 2002.

Whether a hunter applies by telephone or by paper application, the responsibility for entering a valid application rests with that hunter. If you have any questions regarding your application or the application process, more information is available from MNR district and area offices. For a list of MNR offices, refer to page 86.

Applying by Telephone

The telephone application system will allow you to both purchase a deer licence and apply to the antlerless validation tag draw in one phone call. (If you have already purchased a deer licence, you must apply to the antlerless tag draw using the paper application that comes with your licence and game seal. Please refer to the section on Applying by Paper Application.)

To use this system you must have a valid hunting version Outdoors Card. If your Outdoors Card has expired, you must renew it before you use the telephone application system. The quickest, most convenient ways to renew

- with a call to the toll-free, automated Outdoors Card renewal line at 1-800-288-1155; or,
- by connecting to the Internet renewal site at http://outdoorscard.mnr.stores.gov.on.ca

Once you have successfully completed your renewal by either method you may proceed immediately to the telephone application system for the antlerless deer validation tag draw.

For more information on Outdoors Card renewal options, see page 7.

It is recommended that you complete the Antlerless Deer Draw Worksheet for Hunters Applying by Telephone found on page 56 before making your call.

To use the telephone application system, you will need:

- a valid hunting version Outdoors Card number:
- a VISA, MasterCard or American Express credit card. (The charge on your credit card will be \$36.00);
- the first and second choice (if you have one) Wildlife Management Units (including any sub-units) to which you would like to apply; and,
- a Touch-Tone telephone.

During your call, listen to the recorded instructions carefully. You will be asked to confirm your answers, and given the opportunity to change an answer if you make a mistake. Remember that you must respond to the questions asked by using the keypad of your telephone. Do not speak your answers. The information that you enter electronically during your telephone call (using your telephone keypad) is your direct application to the draw.

When keying in the WMU to which you wish to apply, remember that single-digit WMUs (such as 5, 6, 7 etc.) must be entered with a "0" as the first digit. Enter such WMUs by keying 05, 06, 07 etc. Refer to the table titled Valid Antlerless Deer Wildlife Management Units (2002) at the bottom of this page.

Remain on the line to get an Authorization Number. Record this number at the bottom of your Worksheet for future reference.

Confirm your postal code before hanging up. If your postal code is not correct, call the Outdoors Card Centre during regular business hours (1-800-387-7011) to update your address so your licence (and game seal if you are successful in the draw) will reach you, or change your address over the Internet at: http://outdoorscard.mnr.stores.gov.on.ca

As telephone application systems become more common in the big game draw program, we offer these tips to help hunters identify and take advantage of the times when call volumes are usually lower. Keep these guidelines in mind when planning your call:

• the telephone application system is available 24 hours a day, seven days a week, until 11:55 p.m. (EDT) on the day of the deadline for applications;

- · do not leave your call until the day of the deadline! If you wait until the last day and cannot get through because the lines are busy, you will not be able to enter the draw for an antlerless tag. The earlier in the application period you apply, the easier it will be to connect to the system on your first try;
- telephone on a weekend, if possible. We often experience lower call volumes on weekends;
- on weekdays, our telephone lines are generally least busy early in the day and late in the day.

Remember, do not apply to the draw by telephone if you have already submitted a paper application.

. WORK PERMITS

The Public Lands Act states that you must have a work permit before you construct a new building, create trails, or do other modifications on Crown land. Crown land includes the bottom of most waterbodies. Contact an MNR office before you do work on Crown lands. MNR staff will advise you if you require a work permit. Hunters are reminded that it is an offence under the Public Lands Act to leave any material. substance or thing on Crown land.

Your authorization number is:
EP 8. Stay on the line to confirm your postal code to ensure that you receive your licence (and validation tag if successful in the draw) when it is mailed to you. If your postal code is not correct, you should immediately (during office hours) call the Outdoors Card Centre (1-800-387-7011) or go online at http://outdoorscard.mnr.stores.gov.on.co.to update your address. Otherwise you will not receive your licence and game seal.

- ST
 - KEEP THIS WORKSHEET FOR YOUR RECORDS.

Applying by Paper Application

Hunters who wish to apply for an antlerless deer validation tag using a paper application must first purchase a resident's or farmer's deer licence tag (the sticker that goes on the back of your Outdoors Card).

To purchase a deer licence from a licence issuer you must have a valid hunting version Outdoors Card in your possession. If your Outdoors Card has expired, you must renew it before you can purchase your deer licence. The quickest, most convenient ways to renew are:

- with a call to the toll-free, automated Outdoors Card renewal line at 1-800-288-1155; or,
- by connecting to the Internet renewal site at http://outdoorscard.mnr.stores.gov.on.ca

Your new Outdoors Card will reach you in two to three weeks.

For more information on Outdoors Card renewal options, see page 7.

When you buy your deer licence you will receive a paper application for the antlerless deer draw and your game seal.

Fill out the application form carefully and completely.

Write in a valid antlerless deer Wildlife Management Unit (WMU). Be sure to indicate the WMU sub-unit (A, B, C, D, or E) if required. (Refer to the table titled Valid Antlerless Deer Wildlife Management Units (2002) on page 55.) If you need more information or have a question, call a Ministry of Natural Resources office (see page 86 for the list of offices).

Ensure that the Outdoors Card number imprinted on your application for an antlerless deer validation tag is legible. If any portion of the imprinted number is not clear, write it neatly in the space provided at the top of the application. You are not required to indicate a second choice on your application if you do not have a second choice.

Submit your application well before the 5:00 p.m., July 31, 2002, deadline for the antlerless deer draw. Remember that this deadline for your paper application is the date by which your application must have reached MNR. This deadline is NOT a "postmarked by" date. Whether an application is delivered by courier, registered mail or through the regular or government mail, please allow at least five working days for its delivery. All late applications will be rejected from the draw without exception.

Remember, do not submit a paper application if you have already applied to the draw by telephone.

You Will Be Disqualified From the Draw If:

• more than one application (either by telephone or on paper) is submitted in your name;

- · your Outdoors Card is not valid;
- the application is not complete. (For example, if the subunit of the WMU, or season choice is not indicated where necessary.);
- the application is for an invalid WMU or season.
- the writing is not legible;
- the application is received late; or,
- your hunting licence privileges are under suspension.

The responsibility for entering a complete and correct application rests with the hunter. If you have any questions regarding your application, or the application process, more information is available from MNR district and area offices. For a list of MNR offices, refer to page 86.

Draw Results Telephone Line

Draw applicants may call the toll-free Draw Results Line at 1-800-288-1155 to determine the results of the Antlerless Deer Draw. This automated line runs 24 hours a day, seven days a week from September 8 until December 31. Hunters will need their 15-digit Outdoors Card number to access their draw record.

The Mailing of Licences and Antierless Deer Validation Tags

Only successful draw applicants, and those hunters who used the telephone application system to purchase their deer licence, will be notified by mail.

If you applied to the antlerless deer draw by telephone and were successful, the validation tag you receive is part of the game seal that is mailed to you. Remember to remove your resident's deer licence tag from the top left corner of your game seal and affix it to the back of your Outdoors Card before you go hunting.

If you applied to the antlerless deer draw with a paper application and were successful, the validation tag you receive must be affixed to your game seal.

Do not lose your validation tag or game seal.

If you were successful in the draw, or you purchased a licence by telephone, and you have not received your licence and/or validation tag, contact the Ministry of Natural Resources office which serves your area. You can get a duplicate licence and/or validation tag through your ministry office only after signing a declaration and verifying your address information. There may be a charge for this service. After the season starts, duplicate tags will be issued only at the discretion of the ministry.

If you have moved recently and have not informed the ministry of your new address you may not receive your licence/validation tag when it is mailed after the draw. Please call the Outdoors Card Center at 1-800-387-7011 to update your address information, or change your address over the Internet at: http://outdoorscard.mnr.stores.gov.on.ca.

2002 REGULAR DEER SEASONS Rifles, Shotguns, Archery and Muzzle-loaders

Rifles, Shotguns, Archery, and Muzzle-loaders are permitted during many of these seasons, check the conditions under which you may hunt.

WMU(s)	Resident - Open Season	Non-resident - Open Season (antlered deer only)	Conditions (Restrictions Only)
5	Oct. 19 to Nov. 1	No season -	Archery, muzzle-loading guns only; no dogs
5	Nov. 2 to Dec. 15	No season	No dogs
6, 7B, 9A, 9B	Sept. 28 to Oct. 4	Sept. 28 to Oct. 4	Non-Resident Guide Requirement in part of 7B and all of 9B, archery and muzzle-loading guns only; no dogs

82B	Nov. 18 to Nov. 22	Nov. 19 to Nov. 22	Muzzle-loading guns only; no dogs

^{*} Changes have been made to the boundaries of WMUs 82A, 83A, and 84. See page 54 for details or contact the Owen Sound District Office.

Archery Seasons

Archery hunters wishing to hunt antlerless deer in a WMU with an archery-only season (refer to the table below Archery Only Seasons - Deer and continued on page 60) must apply to the antlerless deer validation tag draw in that unit.

Do not apply for an antierless deer validation tag in a WMU with a controlled hunt unless you plan to hunt with a bow during the bow season only. In WMUs that offer controlled hunts, you can use antlerless tags only during the bow-only season. The one exception is WMU 73. In WMU 73, an antlerless tag can be used in the regular gun season or the bows-only season, but a controlled deer hunt tag is required to hunt in the muzzle-loaders only season.

ARCHERY ONLY SEASONS - DEER No Dogs

WMU(s)	Resident - Open Season	Non-resident - Open Season (antlered deer only)	Conditions (Restrictions Only)

[🏁] Changes been made to the boundaries of WMUs 82A, 83A, and 84. See page 54 for details or contact the Owen Sound District Office.

Additional Game Seals for Deer

When deer populations in certain Wildlife Management Units warrant, hunters may be offered the opportunity to purchase an additional game seal and harvest a second deer. The table below shows the MNR offices in southcentral region that will be offering a **limited number** of additional game seals in 2002 on a first come, first served basis.

These seals will be for sale starting Monday, September 9, 2002, at a cost of \$33.00 for a resident and \$160.00 for a non-resident (where non-resident seasons exist). A hunting version Outdoors Card is required for the purchase of an additional seal. Telephone purchases require payment by credit card.

Please contact the appropriate MNR office as shown below for more information.

^{*} Changes proposed to the opening of deer archery season in WMU 37 for 2004. Check with Sault Ste. Marie District Office for details.

[া] Changes have been made to the boundaries of WMUs 82A, 83A, and 84. See page 54 for details or contact the Owen Sound District Office.

Ontario Hunters - A Message from your Conservation Officer

Tearly all Conservation Officers in this province hunt or fish. We know that it is possible to make a mistake or to get caught in a set of circumstances that may put you in violation. If you find yourself in such a situation, it is important that you seek out your local Conservation Officer and discuss your situation with them as soon as possible. At all times this must be done before any animals are moved or the area in question is otherwise contaminated. At the same time, we share the concern that all ethical hunters have about those who would steal or abuse our resources.

Some of you have asked me, "Why don't I see a game warden out there anymore? Are there fewer Conservation Officers in the ministry or have you guys stopped patrolling?"

The answer is that Conservation Officer numbers have not decreased. However, our priorities have been adjusted as we place more emphasis on serious violators and on applying advanced enforcement methods and new technologies. Still, we find the time to patrol for compliance with hunting and fishing laws - last year alone, we contacted over 400,000 resource users!

We firmly believe that we can make a difference in protecting our resources. But we can only be really effective with your help and cooperation:

- Don't let vour silence be a poacher's ally. Speak up and let vour peers know what you think of illegal or unethical behaviour.
- Report violations! Call your MNR district office, tell your local Conservation Officer, or call Crime Stoppers (1-800-222-TIPS). While we may not be able to respond immediately on every occasion, knowing these offences are occurring can assist in planning effective enforcement activities.
- Get involved! Join a local Guardian, Riverwatch, or Community Fisheries and Wildlife Involvement Project. Join your local fish and game club, cottage association or community group and work with us to ensure that the same resources that you and I benefit from today will be here for future generations.

Conservation Officers enjoy speaking with you, the responsible resource user. We value your input on MNR programs and we appreciate your assistance in identifying and apprehending violators. Let's continue to work together to ensure all outdoor enthusiasts follow the regulations.

Have a safe and successful hunting season.

Your local Conservation Officer

ELK RESTORATION PROJEC

Ontario's elk restoration project continues to show success. An additional 166 elk were released in four locations across Ontario in the winter of 2001: Lake of the Woods; Lake Huron-North Shore; Bancroft-North Hastings; and southwest of Sudbury, Ontario's wild elk population currently numbers about 500 animals.

The focus of the elk program for 2001/2002 is on monitoring radiocollared elk and implementing research projects to help assess the results of the program. A study is being completed to verify the health of elk from Elk Island National Park in Alberta, the source of elk for Ontario's re-introduction program.

The success of this project is based on the dedication of numerous provincial and local partner organizations, volunteers and sponsors. Many thanks to Cambrian College. French River Resorts Association, Lakehead University, Laurentian

University, Northern Ontario Tourist Outfitters, Ontario Federation of Anglers and Hunters, Ontario Fur Managers Federation, Ontario Ministry of Natural Resources, Parks Canada, Rocky Mountain Elk Foundation, Sault College, Safari Club International (Ontario Chapter) and Trent University. We also want to acknowledge the tremendous efforts of the local implementation groups in each restoration area: Northwestern Ontario's Elk Restoration Coalition (Lake of the Woods area), Lake Huron-North Shore Local Implementation Committee, Nipissing-French River Local Implementation Committee and the Bancroft-North Hastings Elk Restoration Project Committee.

Three provincial groups and four local groups have raised elk restoration funds to assist with this initiative. If you are interested in helping, please contact any of the following:

Controlled Deer Section

Applying to the Draw for a **Controlled Deer Hunt Validation Tag Draw**

Any resident of Ontario who has a valid hunting version Outdoors Card may apply to the draw for a controlled deer validation tag. Tags are randomly assigned by computer. Each hunter who receives a tag in the draw is permitted to hunt a deer in the WMU specified on the tag during the period indicated.

Hunters who are not successful in the draw for a controlled deer hunt validation tag may not participate in the controlled deer hunt. (NOTE: Hunter Apprentices may participate in a controlled hunt if hunting in the approved apprentice/mentor fashion with a mentor who has a controlled deer hunt validation tag.)

Hunters who are applying to the controlled deer draw do not have to purchase a deer licence prior to applying to the draw. However, hunters who receive a tag in the draw must purchase a deer licence (the sticker that goes on the back of the Outdoors Card) before they can hunt in the controlled hunt.

There are two ways to enter the draw for a controlled deer hunt validation tag:

- by telephone; or,
- by paper application to a Ministry of Natural Resources

NOTE: If you are applying for a controlled deer hunt validation tag as a Farmer/Landowner, you must apply with a paper application to the MNR office with jurisdiction for the WMU in which you wish to hunt. For more information on Farmer/Landowner applications, see page 68.

Your chance of being drawn for a controlled deer hunt validation tag is the same whether you apply by telephone or by paper application, and both application methods are free of charge. Choose one method only – you will be disqualified if more than one application is submitted in your name.

Draw applicants who hunt in a party should apply as a group rather than as individuals. (The benefit of this is that if your group application is selected in the computerized draw, every hunter listed on your application will receive a controlled deer hunt validation tag. The applicant who hunts in a party but applies as an individual risks being the only hunter in the party who is successful, or unsuccessful, in the draw.) The maximum number of hunters that can apply as one group is four.

Whether a hunter applies by telephone or by paper application, the responsibility for entering a valid application rests with that hunter. If you have any questions regarding your application, or the application process, more information is available from MNR district and area offices that offer controlled deer hunts. For a list of MNR offices that offer controlled deer hunts, refer to page 69.

The deadline for applications by telephone is 11:55 p.m. (EDT) on September 3, 2002.

The deadline for paper applications to be received at an MNR office is 5:00 p.m. on September 3, 2002.

Before You Apply - Advance Preparation

You will need a valid hunting version Outdoors Card to apply to the controlled deer draw.

If your Outdoors Card has expired, the quickest, most convenient ways to renew are:

- with a call to the toll-free, automated Outdoors Card renewal line at 1-800-288-1155; or,
- by connecting to the Internet renewal site at: http://outdoorscard.mnr.stores.gov.on.ca.

Once you have successfully completed your renewal by either method you may proceed immediately to the telephone application system for the controlled deer draw or return your paper application to an MNR office.

For more information on renewal options see page 7.

If your Outdoors Card is valid but you have moved since you received it, call the Outdoors Card Centre at 1-800-387-7011 or go on the Internet at: http://outdoorscard.mnr.stores.gov.on.ca and provide your current address. This will ensure that you receive your tag at your new address if you are successful in the draw.

See the 2001 Controlled Deer Validation Tag Draw Results table on page 70 for a general indication of the chances of receiving a controlled deer hunt validation tag in 2002. Selecting a WMU that offers a large number of tags and has relatively few applicants will increase a hunter's chance of getting a validation tag in the draw.

Applying by Telephone

For your convenience the MNR offers you the opportunity to apply for a controlled deer hunt validation tag with a toll-free call to 1-800-288-1155, 24 hours a day, seven days a week from August 1, 2002 to 11:55 p.m. (EDT) on September 3, 2002. There is no fee for this application service.

To use the telephone application system, you will need:

- a Touch-Tone telephone;
- a valid hunting version Outdoors Card;
- the Hunt Code representing the first and (optional) second choice Wildlife Management Units and seasons to which you would like to apply; and,
- if applying as part of a group, you will need to have decided with your group if you are the Group Leader or a Group Member. (If you call in as the Group Leader, you will be given a Group Reference Number to identify your group. If you are a Group Member, you will be asked for the Group Reference Number provided to the Group Leader so your group can be identified.)

When using the telephone application system, it is important to remember that you must respond to the questions asked by using the keypad of your phone. Do not speak vour answers.

What Type of Applicant Are You?

To use the telephone application system, hunters must decide - prior to calling - which type of applicant they are. If your group is using the telephone application system, every member of the group must apply to the draw by telephone.

There are three types of draw applicants:

- Group Leader
- Group Member
- Individual

Hunters applying as part of a group will have to decide who the Group Leader is and who the Group Members are, prior to calling. The maximum number of hunters that can apply as one group is four, comprised of three Group Members plus the Group, Leader.

GROUP LEADER - The Group Leader must be the first member of the group to apply through the telephone application system. The Group Leader is the only member of the group who enters the Hunt Code representing the group's choice of WMU and season. (Refer to the tabled titled Hunt Codes for the 2002 Controlled Deer Draw Telephone Application System on this page.) The Group Leader is then provided with a Group Reference Number to identify the group and its choice(s). The Group Leader must give the Group Reference Number to the Group Members so they may add their names to the group's application when they phone in.

GROUP MEMBERS - Each Group Member must obtain the Group Reference Number from the Group Leader before calling to enter the draw. During the call each Group Member will be asked for the Group Reference Number so the group can be identified and linked together in the draw. Each Group Member will be given a Confirmation Number.

INDIVIDUALS - Individuals must enter the Hunt Code representing their choice(s) of Wildlife Management Unit and season. (Refer to the table titled Hunt Codes for the 2002 Controlled Deer Draw Telephone Application System on this page.) Each individual will be given a Confirmation Number.

Tips for Applying by Telephone

As telephone application systems become more common in the big game draw program, we offer these tips to help hunters identify and take advantage of the times when call volumes are usually lower. Keep these guidelines in mind when planning your call:

- the telephone application system is available 24 hours a day, seven days a week, until 11:55 p.m. (EDT) on the day of the deadline for applications;
- do not leave your call until the day of the deadline! The earlier in the application period you apply, the easier it will be to connect to the system on your first try;
- telephone on a weekend, if possible. We often experience lower call volumes on weekends; and,
- on weekdays, our telephone lines are generally least busy early in the day and late in the day.

The deadline for applications by telephone is 11:55 p.m. (EDT) on September 3, 2002.

Remember, do not apply by telephone if you have already submitted a paper application.

Applying by Paper Application

Hunters who wish to apply for a controlled deer hunt validation tag using a paper application may obtain an application from MNR district and area offices that offer controlled deer hunts. For a list of Wildlife Management Units in which controlled deer hunts will be held, see page 69.

The paper application has spaces on it for up to four hunters to apply to a controlled hunt as a group. The same application may be used by an individual hunter. Individuals have the same chance to receive a tag as group applicants.

To be eligible for the draw, your completed and correctly filled out paper application and the carbon copy must be received at an MNR district or area office by the deadline of 5:00 p.m. on September 3, 2002. If your application is delivered by courier, registered mail or through the regular or government mail, it is suggested that you allow at least five business days for its delivery. All late applications will be rejected from the draw without exception.

Remember, do not submit a paper application if you have already applied to the draw by telephone, or if you are a member of a group which has decided to apply by telephone.

You Will Be Disqualified From the Draw If:

- more than one application (either by phone or on paper) is submitted in your name;
- your Outdoors Card is not valid;
- the application is not complete (for example, if the subunit of the WMU, or season choice is not indicated where necessary.);
- the application is for an invalid WMU or season;
- the writing is not legible;
- the application is received late; or,
- your hunting licence privileges are under suspension.

The responsibility for entering a complete and correct application rests with the hunter. If you have any questions about your application, or the application process, more information is available from MNR district and area offices that offer controlled deer hunts. For a list of MNR offices that offer controlled deer hunts, refer to page 69.

Draw Results Telephone Line

Draw applicants may call the toll-free Draw Results Line at 1-800-288-1155 to determine the results of the Controlled Deer Hunt Validation Tag Draw. This automated line operates 24 hours a day, seven days a week from October 15 until December 31. Hunters will need their 15-digit Outdoors Card number to access their draw record.

The Mailing of Tags

Only successful draw applicants will be notified by mail. If you have called the Draw Results Telephone Line and you were successful in the draw, but have not received your validation tag, contact the Ministry of Natural Resources office which serves your area. You can get a duplicate validation tag through your ministry office only after signing a declaration and verifying your address information. After the season starts, duplicate tags will be issued only at the discretion of the ministry.

With your tag you will receive a Controlled Deer Hunt Report. It is mandatory that every person who receives a controlled deer hunt validation tag complete and return the Report to the MNR office which offered the hunt (see address on the back of the Report) within two weeks of the hunt. On the form you will be asked to report the number of deer and wild turkeys you saw while hunting, as well as details of your deer harvest.

Farmer and Landowner Deadline for a Controlled Hunt Validation Tag

Farmers and landowners may apply for a controlled deer hunt validation tag if:

• they own 20 hectares (50 acres) or more of land in a Wildlife Management Unit (WMU) that is offering a controlled hunt;

OR

• their occupation is farming and they have an Ontario Ministry of Agriculture, Food and Rural Affairs Farm Business Registration Number (or letter of exemption from the Farm Organization Accreditation Tribunal) in a WMU that is offering a controlled hunt:

• they are the owner or the sole designated representative (president, vice-president, treasurer or secretary) of a company which owns a parcel of land of 20 hectares (50 acres) or more in the WMU that is offering a controlled deer hunt.

Farmers and landowners meeting one of these criteria will be issued a validation tag if:

 they hold a valid hunting version Ontario Outdoors Card and a licence to hunt deer:

 they submit an application to the MNR office that administers the controlled hunt they wish to take part in before 5:00 p.m. on October 1, 2002.

An immediate relative of the farmer or landowner meeting the above criteria also qualifies to receive a controlled deer hunt validation tag. An application signed by the landowner must be submitted to the MNR office that administers the controlled hunt in which the hunter wishes to take part. "Immediate relative" when used in reference to a person, means that person's grandparent, parent, spouse (or same-sex partner), child, sibling or grandchild.

Tentative Controlled Deer Hunt Season Start Dates for 2003 and 2004

Season	WMU(s)	2003 Start	2004 Start
Deer Rifle, Shotgun, Muzzle-loader Controlled Seasons	76A	Season 1 - Nov. 3 Season 2 - Dec. 1	Season 1 - Nov. 1 Season 2 - Nov. 29
Deer Shotgun, Muzzle-loader Controlled Seasons	53B, 79C, 79D, 80, 87B, 87C, 87D, 87E, 89A, 89B	Nov. 3	Nov. 1
Deer Shotgun, Muzzle-loader Controlled Seasons	76B, 76C, 76D, 77B, 77C, 78A, 78B, 81A, 81B, 85A, 85B, 85C, 90A, 90B, 91A, 91B	Season 1 - Nov. 3 Season 2 - Dec. 1	Season 1 - Nov. 1 Season 2 - Nov. 29
Deer Shotgun, Muzzle-loader Controlled Seasons	69A2, 70, 86A, 86B, 93A, 93B	Dec. 1	Nov. 29
Deer Shotgun, Muzzle-loader Controlled Seasons	94B	No season	Nov. 1
Deer Archery, Muzzle-loader Open Seasons	72A, 73, 74A, 75, 80	Dec. 1	Nov. 29
Deer Muzzle-loader Controlled Seasons	76E	Season 1 - Nov. 3 Season 2 - Dec. 1	Season 1 - Nov. 1 Season 2 - Nov. 29
Deer Muzzle-loader Controlled Seasons	91A, 91B	Nov. 17	Nov. 15
Deer Muzzle-loader Controlled Seasons	92A, 92B, 92C, 92D	Season 1 - Nov. 3 Season 2 - Nov. 17 Season 3 - Dec. 1	Season 1 - Nov. 1 Season 2 - Nov. 15 Season 3 - Nov. 29

FISH & WILDLIFE GUARDIANS

Resource protection and conservation is a shared responsibility of everyone in Ontario. Effective compliance programs are an integral part of the Ministry of Natural Resources' (MNR's) contribution to resource protection. This is why MNR developed the Fish & Wildlife Guardian Program. The program gives interested members of the public the opportunity to assist MNR Conservation Officers with achieving compliance with the ministry's conservation laws.

How do Guardians do this?

- by answering questions from the general public about rules which govern fishing, hunting, trapping and other resource related activities;
- by providing local expertise and knowledge about area specific regulations;
- by being a source of information about local opportunities to enjoy resource related recreational opportunities;

- by acting as a deterrent by their presence in areas where resource violations have been known to occur; and,
- by acting as "eyes & ears" for local Conservation Officers by reporting any violations which they may encounter in the course of their Guardian duties.

Guardians receive 16 hours of training and an annual recertification to prepare them for their role.

They are issued a distinctively crested vest and cap, so that the public may readily identify them.

If you think that THIS PROGRAM may be FOR YOU, contact your local MNR office for further details about the Guardian program or visit the Guardian Web page at: http://www.mnr.gov.on.ca/MNR/fishing/guard.html

Black Bear Seasons and Other Regulations

Licence Fees (GST is included in all fees)

Non-residents must have a Black Bear Hunting Licence Validation Certificate as well as a black bear hunting licence. They must also complete the report that comes with the certificate and return it to the issuer of the certificate by the date indicated.

Non-resident's Export Permit Fee (also see Export and Shipping). \$35.00

Resident's Export Permit Fee issued at no charge.

CITES Export Permit Fee issued at no charge.

Firearms

Big game, including black bears, may only be hunted with a firearm (this includes bows).

A rim-fire rifle, a shotgun smaller than 20 gauge when loaded with shot or any shotgun loaded with shot smaller than SG or No. 1 buck cannot be used for hunting black

When archery hunting, bows must meet the following specifications.

Crossbows:

- draw length must be at least 300 mm (11.8 in.);
- draw weight must be at least 54 kg (119 lbs.);
- bolt head must be at least 22 mm (0.9 in.) at the widest point; and,
- there must be at least two cutting edges of straight, sharp, unserrated, barbless steel.

Longbows:

- draw weight must be at least 22 kg (48.5 lbs.) at draw length of 700 mm (27.6 in.) or less;
- arrow length must be at least 600 mm (23.6 in.);
- arrow head must be at least 22 mm (0.9 in.) at the widest point; and,
- there must be at least two cutting edges of straight. sharp, unserrated, barbless steel.

For information on measuring draw length and arrow length, refer to page 13 under "Firearms".

Other Black Bear Hunting Regulations

You may not hunt black bears while they are swimming.

You may not hunt black bears within 400 m (437 yd.) of a waste disposal site, regardless of whether the land is Crown or private. You may not shoot or interfere with black bears in their dens or damage or destroy their dens.

You cannot possess a bear gallbladder that has been separated from the bear carcass. Leave the gallbladder with the entrails upon gutting your bear.

Dogs used to hunt black bear or accompanying you when hunting bear must be licensed.

Export and Shipping

Residents and non-residents must have an Ontario export permit to export a black bear or any part thereof from Ontario. You may obtain an export permit from most MNR offices in the area where the animal has been taken. You should obtain the necessary export permits before reaching a border point to avoid any inconvenience. A resident may temporarily transport a black bear out of Ontario without an export permit if the resident is on the way to a location in Ontario and does not leave any part of the black bear outside Ontario.

A non-resident must pay \$35.00 for an export permit.

Export permits have sub-permits attached to them for exporting a part or parts of the animal for which an export permit has been issued. You may use up to three sub-permits for this purpose. Receptacles-containing game wildlife or specially protected wildlife that are being shipped or transported to points inside or outside Ontario must have the names and addresses of the sender and receiver, and a list of the contents written on the outside.

Except as outlined below, a resident or non-resident black bear hunter must also obtain a CITES export permit through an MNR office when a black bear or its parts are being exported from Canada. The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) is an international agreement which regulates trade in a number of species of animals including black bear, their parts and derivatives, and any articles made from them.

A Canadian CITES export permit is no longer required for U.S. or Canadian resident bear hunters taking their black bear in a fresh, frozen or salted condition, back to the U.S. or through the U.S. enroute to another part of Canada at the conclusion of their hunt. The trophy must be part of the hunters accompanying baggage. Note: trophies sent as cargo, even if on the same flight as the hunter, are considered commercial and must be accompanied by CITES permits. This exemption does not apply to taxidermy trophies or black bears that are in any condition other than fresh, frozen or salted.

CITES export permits are still required for **ALL** black bear exports to countries other than the United States.

CITES permits are not normally available near border crossings and consequently hunters are advised to obtain any required permits from a source closest to where they are hunting. In some instances, both a CITES and a Provincial Export permit are required.

CITES export permits are available free of charge.

In some countries, importation of black bear is restricted. Requirements for importation should be determined by the exporter.

Non-residents

A non-resident who wishes to hunt black bear in Ontario must have a Black Bear Hunting Licence Validation Certificate to validate a non-resident black bear hunting licence. This certificate can be obtained from a tourist operator (operator of a tourist establishment, guide or air carrier) licensed in Ontario to provide black bear hunting services to non-residents.

The following non-residents are not required to use a licensed tourist operator:

- Non-residents who hunt with an immediate relative who is an Ontario resident licensed to hunt black bear in a Wildlife Management Unit (WMU) that has an open season for non-residents. Immediate relative when used in reference to a person, means that person's grandparent, parent, spouse (or same-sex partner), child, sibling or grandchild.
- Non-residents who are owners of property in a WMU that has an open black bear season for non-residents.

Non-residents who qualify under either of these two exceptions may apply for the certificate at an MNR office in the area of the hunt. Where a property is owned by more than one person or by a corporation, only one certificate will be issued. See also Licence and Tag Information, page 5.

A non-resident hunter using the bear hunting services of an operator licensed to provide black bear hunting services must hunt only on the areas designated on the Black Bear Hunting Licence Validation Certificate issued to him/her by the operator. These areas can include Crown land located within a Bear Management Area (BMA) assigned to the operator, private land located within a BMA assigned to the operator and private land located within a WMU. The operator must have permission of the landowner in order to provide bear hunting services to clients on private land. The licence to provide bear hunting services on private land located within a BMA licensed to another operator.

Resident hunters are not restricted to BMAs and may hunt anywhere on Crown land, or on private land with the owner's permission.

Party Hunting for Black Bear

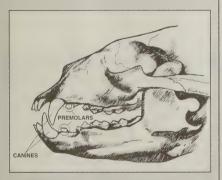

The term "Party hunting for black bear" means two or more persons hunting black bear, during an open season for black bear, under the following conditions:

- each person has a valid licence to hunt black bear:
- each person has agreed to hunt black bear co-operatively during a period in an area that can reasonably be hunted by the persons during that period so that the intended objective of the hunt can be achieved:
- the total number of black bears killed by the party does not exceed the total number of game seals held by the members of the party licensed to hunt black hear.

A person may hunt in a party even if the person has previously attached his or her seal to a black bear.

HELP THE MINISTRY COLLECT BEAR HARVEST INFORMATION

Black bear hunters can assist the Ministry of Natural Resources by submitting two premolar teeth from their bears for analysis.

The teeth will be examined to determine the age of the animals in the provincial harvest. In return for this support of MNR management efforts. you will be provided with an Ontario Bear Hunter Crest. Please contact the MNR office in the area in which you will be hunting, or your outfitter, for more information.

Sealing and Transporting Rlack Rear

Once you have killed a black bear, you must immediately after the kill and at the kill site, securely attach the game seal to the animal. The seal must remain attached while transporting the carcass.

You must notch out the month, date and time of the kill on the game seal.

If party hunting for bear, the shooter or a member who is hunting in the party must immediately after the kill and at the kill site securely attach the game seal to the animal.

Only the hunter whose game seal is to be used is allowed to attach the seal to the black bear. It is illegal to transfer a game seal in order to seal a black bear.

You cannot possess a bear gallbladder that has been separated from the bear carcass. Leave the gallbladder with the entrails upon gutting your bear.

SEALING BLACK BEAR

Instructions for Attaching the Black Bear Seal

- 1. Pierce the cartilage separating the nostrils.
- 2. Insert the string/twine through the hole such that the two ends are left exposed.
- 3. Peel the backing from the seal.
- 4. Place the seal over the string/twine as in illustration.
- 5. Press the surfaces together to seal securely.
- 6. Notch out the month and day of the kill.

2002 BLACK BEAR SEASONS

Rifles, Shotguns, Archery and Muzzle-loaders

.WMU(s)	Resident - Open Season	Non-resident - Open Season	Conditions (Restrictions Only)
1, 11A, 11B, 12A, 12B, 13, 14, 15A, 15B, 16A, 16B, 16C, 17, 18A, 18B, 19, 21A, 21B, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45	Aug. 15 to Oct. 15	Aug. 15 to Oct. 15	
2, 3, 4, 5, 6, 7B, 8, 9A, 9B, 10	Aug. 15 to Oct. 31	Aug. 15 to Oct. 31	
7A	Aug. 15 to Oct. 31	Aug. 15 to Oct. 31	Archery and muzzle-loaders only
46, 47, 49, 50, 53A, 53B, 64, 66, 67, 69A, 69B, 71, 72, 73, 74, 75, 76, 83, the geographic townships of Keppel and Sarawak in 82A and the geographic township of Amabel in 84	Sept. 3 to Nov.30	Sept. 3 to Nov. 30

HATS FOR HIDES: Conservation Through Cooperation

We are facilitating the efforts of Aboriginal peoples involved in administering the coordination of the collection program. Hunter participation in this program ensures the whole use of harvested animals and benefits Aboriginal peoples. Details concerning locations, dates and times that any local hide collection centres will be operating are available, in the fall, from the M'TIWA-KI Services office (1-888-873-3319) or from MNR offices. Look for the bright orange Hats for Hides depot signs.

You will receive a specially designed gift recognizing a successful hunt in return for a suitably prepared bear, deer or moose hide when delivered to a designated collection centre.

Treat the hide carefully. Avoid making any cuts or nicks in the hide when skinning. Remove as much flesh as possible. Decay can begin almost immediately so, if you can't get the hide to a collection depot immediately, preserve the hide by rubbing coarse salt (1 kg [2 lb.] for deer and 2 kg [4 lb.] for moose) into the flesh side of the hide. Only freeze hides that will be home tanned. When transporting the hide use a cardboard box or burlap bag. Do not put the hide in plastic. Even when salted the hide will decay if no air reaches it. Spoiled hides will not be accepted.

YOUR COOPERATION IS APPRECIATED! CONSERVATION IS A WAY OF LIFE

Small Game Seasons and Other Regulations

Licence Fees (GST is included in all fees)

1. Resident's licence tag to hunt small game.....

This licence is valid for a resident to hunt game birds (other than wild turkey), game mammals (except bear, caribou, deer, elk, moose). Under this licence you may also hunt coyote, wolf, raccoon, red fox, arctic fox, grey fox, skunk and weasel. You also need it to hunt on hunting preserves. A small game licence also permits you to hunt American crow, brown-headed cowbird, common grackle, house sparrow, red-winged blackbird or starlings.

If you wish to hunt raccoon at night, you must carry your raccoon licence and your Outdoors Card that has a small game licence tag attached. You can only use a .22 calibre rim-fire chambered to .22 short, .22 long or .22 long rifle for hunting raccoon at night. You must be accompanied by a dog licensed for raccoon hunting.

This licence authorizes a non-resident to hunt fox, game birds (except wild turkey), rabbits and hare in most areas, raccoon (though not at night), wolf, coyote and black, grey and fox squirrels but not red squirrels. The non-resident's small game licence also authorizes the holder to hunt game birds on game bird hunting preserves. This licence does not authorize the holder to hunt American crow, brown-headed cowbird, common grackle, house sparrow, red-winged blackbirds or starlings. However, you can hunt wild turkey if you possess a wild turkey licence in addition to a non-resident small game licence.

A non-resident licence does not allow you to hunt rabbits in the county of Lambton, the Municipality of Chatham/Kent, or the county of Essex, except in the Township of Pelee.

5. Non-resident's licence to hunt game birds on a game bird hunting preserve \$15.00

To hunt game birds including wild turkeys on a game bird hunting preserve only, a non-resident must have this licence.

Firearms

In an area where there is an open season for deer, moose or black bear when hunting small game, you may not possess or use a rifle of greater calibre or projectile power than a .22 calibre rim-fire rifle chambered to .22 short, .22 long or .22 long rifle or shells loaded with ball or with shot larger than number 2 shot, unless you possess a valid licence to hunt deer, moose or black bear as the case may be.

If using non-toxic shot, you may not use steel shot larger than triple BBB steel shot, or bismuth shot that is larger than double BB bismuth shot.

The above does not apply where there is an open season for hunting deer with a bow only.

You may not use a rifle of greater calibre than .275, except a flintlock or percussion cap muzzle-loading gun, for hunting small game in the counties of: Brant, Elgin, Essex, Huron, Lambton, Middlesex, Northumberland, Oxford, Perth and Wellington and the regional municipalities of Chatham/Kent, Durham, Haldimand-Norfolk, Halton, Hamilton-Wentworth, Niagara, Peel, Waterloo and York and the City of Toronto.

Export and Shipping

Small game with the exception of furbearing mammals (see page 79) may be exported on the small game licence. Receptacles containing game wildlife or specially protected wildlife that are being shipped or transported to points inside or outside Ontario must have the names and addresses of the sender and receiver, and a list of the contents written on the outside.

GAME BIRDS

You may hunt and possess wild turkey, pheasant, ruffed grouse, sharp-tailed grouse, spruce grouse, ptarmigan, Hungarian partridge and northern bobwhite. Check the tables for bag and possession limits. You require a special licence to hunt wild turkey.

You may only hunt game birds identified in the tables. In addition, residents may hunt American crow, brown-headed cowbird, red-winged blackbird, common grackle, starling and house sparrows.

Migratory Game Birds

The Migratory Birds Convention Act and its regulations govern hunting of migratory game birds. It is illegal to hunt migratory birds within 400 m (437 yd.) of where bait has been deposited unless that place has been free of bait for at least seven days. You must have a Migratory Game Bird Hunting Permit and a Wildlife Habitat Conservation Stamp, as well as an Ontario licence to hunt small game, to take migratory game birds.

When transporting migratory game birds, a fully feathered wing must remain attached until the bird is prepared for immediate consumption.

Migratory Game Bird Licensing (waterfowl, common moorhens, American coots, common snipe, woodcock and rails [other than King rails])

You must have a federal Migratory Game Bird Hunting Permit and a Wildlife Habitat Conservation Stamp, as well as an Ontario licence to hunt small game, including hunting with falconry birds and non-indigenous falconry birds. You may buy a Migratory Game Bird Hunting Permit and Wildlife Habitat Conservation Stamp at most post offices.

See page 13 for more information regarding falconry.

Specially Protected Birds

You must not shoot specially protected birds or interfere with the eggs and nests of game birds and specially protected birds. (See Glossary, page 84 and Endangered Species, page 17). In addition, you may not shoot or interfere with the eggs and nests of double crested cormorants.

Game Bird Hunting Preserves

You may hunt pheasant, northern bobwhite and wild turkey throughout the year on game bird hunting preserves. You must arrange with the owner as to when you can hunt. Ontario residents need a licence to hunt small game when hunting on a preserve.

A non-resident hunter needs a non-resident tag to hunt game birds on a game bird hunting preserve. This tag may be either a non-resident's tag to hunt game birds on a game bird hunting preserve or a non-resident's tag to hunt small game.

ONTARIO'S WILDLIFE - Some Species need our help

The Ministry of Natural Resources wants to work with you to protect Ontario's species at risk. To learn more about species at risk and ways you can help them, check out the many interesting Web sites on the Internet. Here are a couple to get you started:

www.rom.on.ca/ontario/risk.html or www.OntarioParks.com/sar.html

Species at risk - act today so they have tomorrow

PHEASANT (2002)

TOWNSHIP/MUNICIPALITY LICENCES - A township licence is required in addition to a provincial licence for hunting pheasants in a regulated township (see maps). Contact the municipal clerk for issuance of township licences and information on firearm restrictions. Hunting of pheasants with a rifle is prohibited.

Changes are being considered for the northern bobwhite season in WMU 65.

Small Mammals

Furbearing Mammals

You may only hunt the furbearing mammals listed on the table below under the authority of your small game licence.

If you wish to hunt raccoon at night, you must carry your raccoon licence and your Outdoors Card with a small game licence tag attached. You must also be accompanied by a dog licensed for raccoon hunting. You can only use a .22 calibre rim-fire rifle chambered for the following cartridges: .22 short, .22 long or .22 long rifle. Raccoon night hunters must have their guns encased while in the vehicle. A licensed night raccoon hunter may use a light if it is not shone from or attached to a vehicle or boat.

Raccoon night hunters who have submitted a completed Season End Harvest Report are not required to obtain a Licence to Possess a Pelt to possess raccoon pelts or carcasses during the closed season. Small game hunters who harvest furbearing mammals during the open season and have not disposed of the pelts by the close of the season must obtain a Licence to Possess a Pelt in order to possess pelts during the closed season. This licence is available at all MNR offices.

Royalty is payable on all furbearers before the pelts are sent to be tanned or treated, including taxidermied.

Export and Shipping

You must have an Ontario export permit to export any furbearing mammal or its pelt from Ontario. Royalties are payable on all furbearers prior to export from Ontario.

The Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) is an international agreement which regulates trade in a number of species of animals and plants, their parts and derivatives, and any articles made from them. You need a CITES permit to export wolf, black bear and several other species from Canada. CITES permits are currently available free of charge from most MNR offices. See page 73 concerning recent CITES permit changes related to black bear.

In some countries, importation of wolves is restricted; requirements for importation should be determined by the exporter.

FURBEARING MAMMALS WHICH MAY BE TAKEN UNDER THE AUTHORITY OF A SMALL GAME LICENCE

Note: Regulation changes affecting wolf hunting and trapping in the townships surrounding Algonquin Provincial Park are included in the table below.

Open Seasons

Species	Area	Open Season
Coyote	In any part of Ontario except the townships of Hagarty, Richards and Burns in the County of Renfrew	All year. Note: Small game licences are not valid from June 16 to August 31 in part of Ontario lying north and west of a line from Georgian Bay to the Ottawa River formed by the southerly boundary of the District Municipality of Muskoka, and the southerly and easterly boundaries of the Territorial District of Nipissing
Coyote	In the townships of Hagarty, Richards and Burns in the County of Renfrew	Oct. 1 to Dec. 14 Apr. 1 to Sept. 30
Wolf .	In any part of Ontario except the geographic townships of Chisholm, Boulter, Calvin, Lauder, Papineau, Boyd, Cameron, Clara, Maria, Head, Rolph, Wylie, Petawawa, McKay, Alice, Fraser, Hagarty, Richards, Burns, Dickens, Murchison, Airy, Sabine, Clyde, McClure, Bruton, Herschel, Harcourt, Dudley, Harburn, Eyre, Havelock, Livingstone, McClintock, Franklin, Finlayson, Sinclair, McCraney, Butt, Paxton, and Ballantyne	From October 1 to September 30 of the next year. NOTE: Small game licences are not valid from June 16 to August 31 in part of Ontario lying north and west of a line from Georgian Bay to the Ottawa River formed by the southerly boundary of the District Municipality of Muskoka, and the southerly and easterly boundaries of the Territorial District of Nipissing
Wolf	In the geographic townships of Chisholm, Boulter, Calvin, Lauder, Papineau, Boyd, Cameron, Clara, Maria, Head, Rolph, Wylie, Petawawa, McKay, Alice, Fraser, Hagarty, Richards, Burns, Dickens, Murchison, Airy, Sabine, McClure, Herschel, Harcourt, Dudley, Harburn, Eyre (portion located outside Algonquin Provincial Park), Havelock, Livingstone, McClintock, Franklin, Finlayson, Sinclair, McCraney, Butt, Paxton, and Ballantyne	Closed Season

FURBEARING MAMMALS (continued)

Species	Area	Open Season	
Wolf In the geographic townships of Clyde, Bruton and the poof Eyre (McRae addition) located within Algonquin Provincial Park		Closed Season	
Raccoon	All of Ontario	Oct. 15 to Jan. 15	
Red Fox	All of Ontario north of French and Mattawa rivers	Sept. 15 to last day of Feb. of the next year	
	Remainder of Ontario	All year	
Arctic Fox	All Ontario	Oct. 25 to Mar. 31

RABBITS AND HARES SEASONS

Cottontail Rabbit, European Hare, Varying (Snowshoe) Hare

TOWNSHIP/MUNICIPALITY LICENCES - A township licence is required in addition to a provincial licence for hunting rabbits in a regulated township (see maps). Contact the municipal clerk for issuance of township licences and information on firearm restrictions.

NON-RESIDENTS NOTE: A non-resident licence does not allow you to hunt rabbits in the county of Lambton, the Municipality of Chatham/Kent or the county of Essex, except in the Township of Pelee.

WMU(s)	Open Season	Daily Limit
1-50, 53-59	Sept. 1 to June 15	
61-67, 69B	Sept. 20 to Mar. 31	1) Cottontail Rabbit:
60A, 68, 69A, 70, 71, 74, 75	Sept. 25 to Mar. 31	limit of 6
72, 73, 76, 77, 81-86	Sept. 25 to Feb. 28	2) European Hare:
78-80, 87, 90, 91, 92	Oct. 16 to Feb. 28	3) Varying Hare:
88, 89	Oct. 23 to Feb. 28	- for WMUs 1-50 and 53-59 - no limit; - WMUs 60-95 - 6 maximum
93, 94	Oct. 30 to Feb. 28	- WMOS 00-75 - 0 maximum
95	Jan. 1 to Feb. 28

Game Amphibians and Reptiles

Frogs and Turtles

You may take snapping turtles, bullfrogs or other frogs that are not protected if you have an Outdoors Card with the appropriate fishing validation tag attached. If you are a non-resident, you must have a valid non-resident sport fishing licence.

You may not take more than two snapping turtles a day, nor may you possess more than five snapping turtles. No commercial harvest of snapping turtles is permitted. You may only take snapping turtles by box or funnel traps or by your bare hands. You may not remove the upper shell from any snapping turtle until immediately before it is prepared for consumption.

You may take bullfrogs from July 21 to October 15. You may not take more than 10 bullfrogs in one day not possess more than 10. Bullfrogs may not be taken in the City of Ottawa (formerly the Regional Municipality of Ottawa-Carleton), the counties of Prescott and Russell, Stormont, Dundas and Glengarry, Leeds and Grenville, Lanark, Frontenac, Lennox and Addington, Prince Edward, Northumberland, Peterborough and the City of Kawartha Lakes (formerly Victoria County) or in the townships in the County of Hastings south of and including the townships of Marmora and Lake, Tudor and Cashel, and Elgevir and Grimsthorpe.

No firearm other than a longbow or crossbow may be used to take bullfrogs. Contact an MNR office for further information and see the fishing summary for additional information.

NOTE: It is illegal to harvest bullfrogs or turtles in provincial parks.

OPEN SEASON FOR SNAPPING TURTLES

WMU(s)	Residents	Non-Residents	
2-45	All year	All year	
61, 62	All year	July 15 to Sept. 15	
46-50, 53-60, 63-95	July 15 to Sept. 15	July 15 to Sept. 15	

REPTILES NEED HUNTERS' HELP

Have you spotted any reptiles in the Georgian Bay area lately? If you have, the Ministry of Natural Resources (MNR) wants to hear from you.

The eastern massasauga rattlesnake and eastern fox snake are designated "Threatened" by the Committee on the Status of Endangered Wildlife in Canada (COSEWIC). There are also four species designated "Special Concern": the eastern hognose snake, five-lined skink, spotted turtle and wood turtle. A seventh species the Blanding's turtle, is under review for designation. In addition to these species found in the Georgian Bay area, there are seven more reptiles at risk in other parts of the province.

Snakes are often killed unnecessarily due to misinformation, fear or superstition. Their decline is also due to the loss of suitable habitat and collection from the wild to be kept as rare pets. MNR biologists are trying to gather information on where these reptiles actually exist, to help concentrate their research efforts.

A monitoring program, part of the Greater Georgian Bay Reptile Awareness Program and a joint initiative of MNR. Midhurst and Parry Sound Districts and Ontario Parks' Central Zone, started during late summer 2001.

Hunters can help by reporting any sightings of reptiles to MNR district office or Ontario Parks offices or by contacting the program co-ordinator at MNR's Party Sound office at (705) 773-4246.

To learn more about these species visit the Royal Ontario Museum Web site at www.rom.on.ca/ontario/risk.html.

For rare reptiles found in other locations in the province, hunters can report signings to the Natural Hentage Information Centre (NHIC) at (705) 755-2159 or visit the NHIC Web site at www.mur.gov/onecommunitic/inhic.html.

Species at risk - act today so they have tomorrow

Waterfowl Information

Migratory game bird seasons are the responsibility of the Federal Government. In the past as a service to hunters, we included the migratory game bird seasons in the Ontario Provincial Hunting Regulations Summary. However, the waterfowl seasons will not be finalized until June 2002 and therefore were not available at press time.

For further information contact:

Canadian Wildlife Service, Environment Canada, 867 Lakeshore Road. Burlington, Ontario L7R 4A6 (905) 336-4464. or visit the Web site at: http://www.cws-scf.ec.gc.ca/bub/summ/ont.bdf.

The Migratory Game Bird Hunting Regulation summaries will be available at Canada Post Outlets by August 1.

The Migratory Birds Convention Act and the regulations govern hunting of migratory game birds. It is illegal to hunt migratory birds within 400m (437 vd.) of where bait has been deposited unless that place has been free of bait for at least seven days. You must have a Migratory Game Bird Hunting Permit and a Wildlife Habitat Conservation Stamp, as well as an Ontario licence to hunt small game, to take migratory game birds.

REPORTING OF BANDED BIRDS: A

new toll-free telephone number is available to bird, please call 1-800-327-BAND (1-800-327-2263) and provide your information. Banding information is very important for the management of migratory birds.

NON-TOXIC SHOT: Non-toxic shot must be used for migratory game bird hunting throughout Ontario, except for woodcock.

ONTARIO WETLA HABITAT FUND

Providing Financial Assistance for Private Landowners

Wetlands are Ontario's most diverse and productive habitats. In the southern part of the province, wetland losses have been dramatic, and most of those that remain are found on private lands. The conservation of these areas depends upon the goodwill of landowners.

The Wetland Habitat Fund was established in 1997 under auspices of Ontario's Eastern Habitat Joint Venture Program to help landowners protect and improve the health of wetlands and adjacent uplands on their lands. In just five years, the program has helped fund more than 400 projects. Landowners may be eligible for up to 50 per cent of project costs to a maximum of \$5,000. In return, landowners must sign a 10-year conservation agreement.

The Wetland Habitat Fund receives financial support from the Ontario Ministry of Natural Resources, Wildlife Habitat Canada, the Canadian Wildlife Service and from the U.S. Fish and Wildlife Service through the North American Waterfowl Management Plan. A portion of the funds made available to landowners is from the sale of Wildlife Habitat Canada's Wildlife Habitat Conservation Stamp, which is part of the federal migratory game bird hunting permit.

Interested landowners can contact the Wetland Habitat Fund Manager by telephone at 613-722-2090, extension 252, or by visiting the Fund's Web site at www.wetlandfund.com.

WILDLIFE HABITAT HABITAT FAUNIOUE

BOATING TIPS FOR HUNTERS

In spring and fall when water temperatures are low, your chances of survival if you fall overboard are considerably reduced. Remain with your boat and try to pull yourself out of the water.

- · Wear your life vest.
- Don't wear open-top rubber boots or waders. You're sure to sink if you fall overboard. Carry a pair of ankle boots to wear in the boat.
- Control your hunting dog. A rowdy retriever can capsize a boat. Keep your dog quiet and under control.
- Don't stand up in a small boat. If you want to change places, or if Mother Nature calls, go ashore.

See regulations regarding "Use of Vehicles or Boats" on page 15.

THE EASTERN HABITAT JOINT VENTURE

An International Wetland Conservation Partnership

In May 1986, Canada signed the North American Waterfowl Management Plan with the United States. This event marked the beginning of one of the most successful conservation partnerships of the century. In 1993, Mexico joined the partnership and the initiative became truly continental in scope. By this time, the Plan was well on its way to protecting wetlands and restoring waterfowl populations to their 1970's levels.

Ontario became a partner in the Plan in 1989 with the creation of the Eastern Habitat Joint Venture (EHJV), one of 14 habitat "joint ventures" established across the continent to implement the Plan in areas of particular significance to waterfowl.

Canadian partners in the Ontario EHJV are Ducks Unlimited Canada, Wildlife Habitat Canada, The Nature Conservancy of Canada, the Canadian Wildlife Service, the Ontario Ministry of Natural Resources and the Ontario Ministry of Agriculture, Food and Rural Affairs. Migratory bird hunters also contribute through the licences and permits they purchase. Other important contributors are the U.S. Fish and Wildlife Service, some U.S. states, Ducks Unlimited Inc. and The Nature Conservancy. In fact, roughly half of the funds spent on Ontario's EHJV program come from U.S. sources.

Over the past 15 years, Ontario's EHJV partners have received more than \$30 million in funding from U.S. sources, have secured over 495,000 acres of wetlands and have enhanced almost 335,000 acres of wetlands.

For more information on the North American Waterfowl Management Plan, visit http://www.nawmp.ca. For additional information on Ontario's EHJV program, contact MNR's EHJV Coordinator at 705-755-1711.

PRECAUTIONS FOR WATERFOWL **HUNTERS TO AVOID** SPREADING MARMFUL EXOTIC SPECIES

Exotic species such as zebra mussels and Eurasian watermilfoil can damage habitat for fish, waterfowl and other wildlife. Waterfowl hunters should be aware that it is possible to inadvertently transport exotic species in or on boats and trailers, as well as decoys. Waterfowlers should assume that any aquatic plant parts could be potentially harmful and should not be transported from one

marsh, lake, or river to another. Also, zebra mussels and their tiny larvae can attach themselves to aquatic plants. If aquatic plant fragments are transported, they could inadvertently transport zebra mussels.

What waterfowl hunters can do to help:

Before the hunting season

- ✓ Switch to elliptical, bulb-shaped, or strap anchors on decoys, which don't collect submersed and floating aquatic plants as easily.
- ✓ If you have moored a boat in waters infested with zebra mussels, follow these tips for removing or killing zebra mussels that might be in or on your boat:

Remove any visible zebra mussels; and

- · wash boat with hot water; or
- · spray boat with high pressure water; or
- dry all parts of the boat for at least five days.

Before hunting

- ✓ Drain the water from boats before transporting to another waterbody.
- Remove aquatic plants or animals that are attached to decoy lines and anchors (mussels could be in sediment attached to boat or decoy anchors).

After hunting

✓ Inspect equipment for any aquatic plants and animals that were not removed after hunting; remove and place them in a compost bin or refuse container.

For more information, contact the toll-free

Invading Species Hotline

at 1-800-563-7711 or your local Ministry of Natural

Resources office.

In 1938, a group of concerned waterfowl hunters recognized the importance of Canada's wetland habitats to waterfowl populations. In an effort to conserve these critical habitats, they formed Ducks Unlimited (DU), the world's leading wetland conservation organization. In 1975, DU began full-time conservation efforts in Ontario and today, thanks to the continued support of waterfowl hunters and other conservationminded individuals, we have conserved close to one million acres of habitat across the province.

DU's success flows from partnerships with the Ontario Ministry of Natural Resources, Canadian Wildlife Service, the United States Fish and Wildlife Service and other government and non-government organizations, landowners and individuals involved in the North American Waterfowl Management Plan through the Eastern Habitat Joint Venture program (see above). These partnerships continue to conserve habitat for waterfowl and other wildlife for the benefit of future generations. However, wetland loss continues, especially in Southern Ontario where threats to wildlife habitat are high.

Ontario's wetlands provide habitat for hundreds of wildlife species, 17 of which are considered to be at risk or endangered. In addition to their importance as wildlife habitat, wetlands help to filter our water and recharge underground aquifers. Wetlands act like sponges, capturing water and releasing it slowly to help avoid the extremes of drought and flood.

For more information on Ducks Unlimited and our wetland conservation programs, please call 1-888-402-4444, or write us at 566 Welham Road, Barrie, Ontario, L4N 8Z7.

Glossarv

ANTLERLESS DEER:

Deer that have no antlers or antlers that are less than 7.5 cm (3 inches) long. Generally, they include adult female deer and fawns of both sexes.

BEAR MANAGEMENT AREA:

An area of Crown land licensed to an operator for providing bear hunting services to non-resident bear hunters.

CONTROLLED HUNT:

Hunts in which the total number of hunters is restricted. A hunter needs a controlled hunt validation tag to participate in a controlled hunt.

CONSERVATION OFFICER:

A Conservation Officer or a Deputy Conservation Officer appointed under the Fish and Wildlife Conservation Act. This term also includes a member of the Royal Canadian Mounted Police, a police officer or First Nations Constable appointed under the Police Services Act, a game officer designated under the Migratory Birds Convention Act, a park warden designated under the National Parks Act if acting under the direction of a Conservation Officer, and a person whose primary employment responsibility is enforcement of fish and wildlife laws in a border jurisdiction if he or she is acting under the direction of a Conservation Officer.

ENCASED:

A firearm is encased if the firearm is completely contained in a case so that it cannot be loaded or unloaded.

EXPORT PERMIT:

The permit required to take a moose, white-tailed deer, black bear or furbearer, or any part of them, out of Ontario.

GAME WILDLIFE:

Game wildlife means a furbearing mammal, game amphibian, game bird, game mammal or game reptile.

FURBEARING MAMMALS:

Badger, beaver, bobcat, coyote, fisher, arctic fox, gray fox, red fox (all phases), lynx, marten, mink, muskrat, opossum, otter, raccoon, red squirrel, striped skunk, weasel (least, longtailed and short-tailed), wolf, wolverine and polar bear.

GAME MAMMALS:

Black bear, woodland caribou, cottontail, white-tailed deer, American elk, European hare, varying hare, moose, gray (black) squirrel and fox squirrel.

GAME BIRDS:

Northern bobwhite, ruffed grouse, sharp-tailed grouse, spruce grouse, gray (Hungarian) partridge, ring-necked pheasant, rock ptarmigan, willow ptarmigan and wild turkey.

GAME REPTILES: Common snapping turtle.

GAME AMPHIBIANS: Bullfrogs.

HUNTING:

Includes lying in wait for, searching for, being on the trail of, pursuing, chasing or shooting at wildlife, whether or not the wildlife is killed, injured, captured or harassed. You need a hunting licence to do any of these things, except where the Fish and Wildlife Conservation Act states otherwise.

LICENCES, TAGS AND GAME SEALS:

OUTDOORS CARD:

An Outdoors Card constitutes a licence to hunt the animals and birds specified on the licence tag when that tag is affixed to the card and accompanied by any applicable paper hunting licences and game seals and/or validation tags.

LICENCE TAG:

Means a tag which, when affixed to an Outdoors Card, constitutes a licence to hunt animals or birds, or a class thereof, specified on the tag.

GAME SEAL:

The seal that must be attached to a moose, deer, wild turkey or black bear as soon as the animal is killed. The seal must remain attached to the animal while it is transported.

VALIDATION TAG OR CERTIFICATE

Means a tag or certificate which validates a licence to hunt game animals of a specified number, age or sex or in a specified area.

VALIDATION TAG: (RESIDENTS)

A validation tag must be affixed to the front of the game seal to allow resident hunters to hunt adult moose or antlerless deer. A validation tag is also required to take part in the controlled hunts for deer. A validation tag for a controlled hunt must be carried on your person and not affixed to the game seal

Moose and deer licences obtained by telephone are validated by the ministry on the game seal itself. They are valid for calf moose or antlered deer in other WMUs during the regular open season providing the game seal has not been used.

VALIDATION TAG (NON-RESIDENTS)

A moose validation tag must be affixed to the back of the

VALIDATION CERTIFICATE

A validation certificate must be carried by non-resident black

MUZZLE-LOADER:

A muzzle-loader is a gun that is loaded through the muzzle. A percussion muzzle-loading gun is considered to be loaded if there is a charge of powder and a projectile in the barrel and a percussion cap on the nipple. A flintlock muzzle-loading gun is considered to be loaded if there is a charge of powder and a projectile in the barrel and the vent is unplugged.

NON-RESIDENT:

A person who does not qualify as a resident (see Resident). The ownership of property in Ontario does not qualify a person for a resident's licence.

PARTY HUNTING:

The term "Party Hunting" means two or more persons hunting during an open season for moose, deer or black bear under the following conditions:

- Each person has a valid licence to hunt moose, deer or black bear.
- · Each person has agreed to hunt moose, deer or black bear co-operatively during a period in an area that can reasonably be hunted by the persons during that period so that the intended objective of the hunt can be achieved.
- The total number of moose, deer or black bear killed by the party does not exceed the total number of game seals held by the members of the party licensed to hunt that species.
- The total number of moose, deer or black bear of a specified sex, age or type killed by the party does not exceed the total number of game seals validated for that sex, age or type that are held by members of the party.

RESIDENT:

A person whose primary residence is Ontario, and who has resided in Ontario for a period of at least six months during the previous 12 months before the time that the person's residence is relevant.

SAME-SEX PARTNER:

Means either of two persons of the same sex who live together in a conjugal relationship outside marriage.

SELECTIVE HARVEST SYSTEM:

The system that controls the harvest of breeding moose and deer. The harvest of adult moose and antlerless deer is restricted to those who hold the appropriate validation tag, which is obtained through a random draw.

SIBLING:

Each of two or more children having one or both parents in common.

SPECIALLY PROTECTED WILDLIFE:

Specially protected wildlife means a specially protected amphibian, specially protected bird, specially protected invertebrate, specially protected mammal or specially protected reptile.

SPECIALLY PROTECTED MAMMALS:

Big brown bat, eastern pipistrelle bat, hoary bat, least bat, little brown bat, northern long-eared bat, red bat, silverhaired bat, eastern chipmunk, least chipmunk, northern flying squirrel, southern flying squirrel, arctic shrew, cinereus (masked) shrew, least shrew, northern short-tailed shrew, pygmy shrew, smoky shrew and water shrew.

SPECIALLY PROTECTED BIRDS (RAPTORS):

Bald eagle, golden eagle, peregrine falcon, northern goshawk, gyrfalcon, northern harrier, broad-winged hawk, Cooper's hawk, red-shouldered hawk, red-tailed hawk, rough-legged hawk, sharp-shinned hawk, American kestrel, American swallow-tailed kite, merlin, osprey, barred owl, boreal owl, burrowing owl, barn owl, eastern screech owl, great gray owl, great horned owl, long-eared owl, northern hawk owl, northern saw-whet owl, short-eared owl, snowy owl and turkey vulture.

SPECIALLY PROTECTED BIRDS (OTHER THAN RAPTORS):

Brewer's blackbird, rusty blackbird, vellow-headed blackbird, blue jay, gray jay, belted kingfisher, white pelican and common raven.

SPECIALLY PROTECTED REPTILES:

Blue racer, eastern massasauga rattlesnake, five-lined skink, black rat snake, Butler's garter snake, eastern fox snake, eastern hognose snake, eastern smooth green snake, Lake Erie water snake, milk snake, northern water snake, queen snake, eastern spiny softshell turtle, Blanding's turtle, map turtle, midland painted turtle, musk turtle, spotted turtle, western painted turtle and wood turtle.

SPECIALLY PROTECTED AMPHIBIANS:

Blanchard's cricket frog, blue-spotted salamander, eastern tiger salamander, four-toed salamander, lefferson salamander, northern dusky salamander, redback salamander, smallmouth salamander, spotted salamander, two-lined salamander, Fowler's toad and gray treefrog.

SPECIALLY PROTECTED INVERTERBRATES:

Karner blue butterfly, monarch butterfly, West Virginia white butterfly, mottled dusky wing, bog elfin, frosted elfin, black swallowtail, giant swallowtail, Old World swallowtail, pipevine swallowtail, spicebush swallowtail, tiger swallowtail and zebra swallowtail.

WILDLIFE MANAGEMENT UNITS (WMUs):

Numbered divisions of the province used for wildlife management. WMU numbers are used in the tables for open seasons to indicate the relevant geographic areas of the province. Contact an MNR office for exact descriptions of WMU boundaries.

Ministry of Natural Resources Offices

If you are not sure whether you can hunt at a certain time and place, or if you have any questions about the regulations, contact:

- the MNR office nearest to where you plan to hunt.
- the Natural Resources Information Centre

Wild Turkey Management

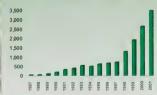

in Ontario

Opportunities for hunting and harvesting wild turkeys have been increasing steadily since 1987 when 64 birds were taken during our first spring season. In 2001, a record 3,495 wild turkeys were harvested.

Wild Turkey Harvest

Hunter Contributions to Wildlife Management

Untario's hunters can be proud of their accomplishments for wildlife conservation in Ontario. Annual voluntary contributions from hunters in Ontario are over \$1.5 million. Average annual volunteer hours spent on habitat conservation projects are 689,800.

In 2000, a Wildlife Habrat Carada study found that, over a 15-year period, funters have directly contributed more than \$335 million and 14 million hours of volunteer time to habitat conservation projects in Canada.

The volunteer efforts and financial contributions of Ontario's hunters, provide vital support to the management of wildlife resources and help ensure their sustainability for future generations.
